NO. 44

COULDN'T BLUFF TREASURER

County Treasurer Price Says He is Not a "School Boy."

The United States court in Chicago, may be and is, a powerful body but when a clerk of that court uses the telephone as a means for conveying an important order and uses County Treasurer L. C. Price as the man to whom the order is conveyed, he finds that he confronts a different proposition than the average man, he finds he cannot as the treasurer said: "Bluff me, not for a minute."

There was a heated conversation over the 'phone leading to Treasurer Price's office Monday afternoon, relative to the sale of delinquent property in Zion City. A clerk of the United States Court called up the office and told Mr. Price that he must not sell the delinquent property in Zion City that the court had ordered that Zion would be protected to the extent that the property will not be sold until they are given time to get money to pay the taxes.

"Well, said Treasurer Price, 'Do I understand this as an order for me not to sell the property?'"

"You do," responded the clerk. "Well, I'll not accept the order in this way," said Mr. Price, getting white as the clerk became rather overbearing, "I am willing to abide by any order of the high court, which I recognize fully but it must be done in a business manner. If you want to enjoin me from selling that property as I understand is the intention then you must send an officer here with proper papers from the court, telling me what I can and cannot do. Otherwise I shall go ahead and sell all the delinquent property, I am no school boy, I know what the law says and I must obey it unless I am properly prevented."

The clerk insisted that he could not sell the land, adding that he was then giving him the order.

"Well business is business and I can observe this kind of an order," said Mr. Price, "How do I know that I am talking to a court officer. I don't think any court in the land would expect me to consider an order of this kind holding, and I won't do it, that is all there is to it. Act in the legal way and I shall obey."

"I have already sold several pieces of land marked with Dowie's name on them and unless a formal order restraining me is received, I shall sell the whole business, for I have no alternative."

And the conversation ended. Mr. Price said that he took up the tax sale Monday morning and among the property which came up was pieces outside of Zion City but in Benton, in Dowie's name, he said he sold them the same as he did the rest for he had received no injunction restraining him.

The pieces were all outside of Zion and Zion proper will be taken up Tuesday unless the court interferes.

The attitude of Mr. Price over the 'phone was backed up by a prominent attorney who was in his office at the time. He said he would not pay attention to the telephone order, contention being that it might have been a person in California, for that matter who was issuing the order.

At any rate the clerk in question was rather impertinent to the treasurer about the matter and he found that he was talking to a man who could not be bluffed for a minute.

Injunction papers restraining the tax sale of Zion lands, until the Dowie-Voliva case should be settled in the court of Judge Kenesaw M. Landis, in Chicago, were served on County Treasurer Price, at 10:00 Tuesday morning, while the tax sales were in progress.

SHOULD FORM AN IMPROVEMENT ASSOCIATION

ANTIOCH IMPROVEMENT ASSOCIATION
Beach Grove, June 25, 1906.

Editor News—This is an organization that can be formed for the benefit of the beautiful village of Antioch.

In Chicago certain districts are included in improvement associations and the city is improved in appearance and in sanitary appearance. The Douglas Improvement Association comprises the streets from 31st to 35th and from the east side of Michigan avenue to the lake. The members pay an annual fee, officers are chosen and men are employed to keep the streets clean and have the weeds kept from vacant lots and from places along the sidewalks. Garbage is not permitted in alleys nor waste paper in yards or on sidewalks. Recently prizes ranging from \$25 to \$50 have been offered for the best kept lawn.

In Antioch people see a vacant lot overgrown by weeds every day as they pass too and from the postoffice. They become accustomed to the nuisance, but a stranger wonders that an enterprising community can endure such an unpleasant sight.

Beach Grove cottagers formed an association several years ago that has been a great advantage to it. No garbage or tin cans are allowed in back yards and the entire grounds are mowed by the association. No weeds are allowed that would be breeding places for mosquitoes.

Let enterprising citizens of Antioch walk about the village with the object of noting the places that could be improved, and a proper and laudable pride will induce steps to be taken for an improvement association, or the writer is mistaken in the citizens of Antioch.

[Editor's Note—By the above communication Antioch citizens are being placed on record for or against the improvement and beautifying of their village. Will they make good. See what the ladies of the Hillside Cemetery association have accomplished for the city of the dead and cannot we do as much for the living? We can make of Antioch a beautiful residence village with an organization of this kind. Who will take the initiative? We think it will have to be the ladies, as the men are all dead.]

SOLDIERS' REUNION

The Executive Committee of the Lake Co. Soldiers' and Sailors' Reunion Association will meet at the G. A. R. Hall, Yankin, Saturday July 7, 1906, at 1 p.m. for the purpose of fixing time and place of holding their annual meet.

Proposals for grounds and entertainment will be received from places that wish to have the reunion.

Edwin Drury, Pres.
H. W. Hall, Sec.

Money First.

But few prize honor more than money—Sallust.

CELEBRATE SILVER WEDDING

Mr. and Mrs. H. J. Middendorff Celebrate their Twenty-Fifth Wedding Anniversary.

On Friday evening of last week Mr. and Mrs. Horace J. Middendorff celebrated their silver wedding at the home of their brother, Charles E. Herman, at Grass Lake. The rooms were prettily decorated for the occasion with an abundance of flowers and foliage, the colors being pink and green. The marriage ceremony was once more performed, the bride standing under a large wedding bell and surrounded by a bower of green. Mr. Lee Middendorff and Mrs. Chaucer Barber, son and daughter of the couple acted as attendants. The groom wore the usual black and the bride was attired in silver grey silk and wore a wreath of roses. E. C. Sabin acted as clergyman and pronounced them man and wife.

Cards were the feature of the evening. Mrs. Charles Herman won ladies first, and Mrs. Albert Herman carried away ladies second prize. Chas. E. Blunt was awarded gentlemen first and Irving Paddock won gentlemen second prize.

At about twelve o'clock dainty refreshments were served on small tables which were prettily arranged and decorated. After luncheon some time was spent in social conversation.

About seventy-five relatives and friends of the bridal pair were present at this enjoyable occasion. The presents were many and beautiful and consisted mostly of silver, cut glass and table linen, and showed the high esteem in which they are held by their many friends. At a late hour the guests departed for their various homes, each expressing a heartfelt wish that Mr. and Mrs. Middendorff might celebrate many more happy anniversaries.

WM. BURKE FOUND IN RIVER.

Gallwood Man was Robbed and Thrown in the Chicago River by Crooks.

Identified by the contents of a letter that his brother had written him from Libertyville, the body of William Burke, well dressed but divested of valuables and money, floated down the Chicago river last week and was pulled out at Polk street bridge.

Burke was a native of Gallwood. He received the letter from the Libertyville man, Mike Burke, roadmaster for the Chicago & Madison, the local branch of the Chicago, Milwaukee & St. Paul R. R. Co., about June 8. This is the clue that led to his identification. Otherwise he would have joined the ranks of the unknown dead.

His steps after he received the letter are not known, except that he drew pay for two months from his section and left for Chicago dressed in his best clothes and with the wallet in his pocket.

When he stepped on the train for Chicago was the last time he was seen by those who knew him.

The theory is that on his arrival in the city he proceeded to become intoxicated. He is known to have been a drinking man. Then he fell into the hands of crooks who may have drugged him and thrown him into the river, on the bosom of which he reposed up to the time of his finding.

He still wore his holiday finery but all of his jewelry and coin were gone.

The brother, who resides at Libertyville, left for Chicago to claim the body, which will be interred in Ohio.

Journalistic Museum.

At Aix-la-Chapelle there is a newspaper museum founded by Oscar von Foreckenbeck, which contains files of specimens of more than 17,000 different newspapers.

FIVE ICE TRUST MEN IN JAIL

Toledo Dealers Sentenced to One Year in Prison and \$5,000 Fine.

Crushed by the weight of the severe and unexpected sentence of \$5,000 fine and one year's imprisonment, the maximum under the law, five Toledo ice dealers, convicted of operating a trust, occupy the second floor corridor in the county jail awaiting commitment to the work house. The men whose punishment was fixed Monday are: Joseph A. Miller, manager of the Toledo Ice and Coal company.

R. C. Lemmon and R. A. Beard of the Hygienic Ice Company.

Peter H. Walters of the Michigan Lake Ice Company.

Henry P. Brening of the Baw Beese Lake Ice Company.

The convicted men, who stood high in the commercial world of the city, are now branded with the stigma of a common criminal as a result of violations of the Valentine anti-trust law, which makes it a crime to enter into a conspiracy in restraint of trade. Miller, Walters and Brening have been engaged in the ice business in Toledo for years. Beard and Lemmon are both young, well known in society and belong to prominent families.

Under the espionage of the sheriff and his deputies the five were taken to the offices of their attorneys in the afternoon, and their ways and means of getting out were discussed. It was finally decided that a petition be filed in the morning asking Judge Kinkadee to commute the sentence or grant them immunity from part penalty on condition that they make restitution to the public. But owing to the fact that the judge is occupied with a big criminal case it is hardly likely that he will hear the application. He intimated to-day that he would not do so, and it seems that there is not a chance for the men to escape at least temporary commitment to the workhouse, where, like the common felon of the streets, they will be compelled to do the prison stripes and help make bricks.

This is the most prompt conviction ever secured here in a case where the men implicated were of such prominence. Two or three of the defendants are worth more than \$100,000 each. In the opinion of prosecuting attorney, Lyman Wachenheimer, to whom goes the credit of the result, it is a great victory of the people.

On March 11 last, so the evidence showed, Miller, Lemmon and Beard met in the office of the Toledo Ice and Coal Company and agreed upon a schedule of prices for this summer. This schedule was then taken to the other ice men, and they too agreed upon it. This was the inception of the ice trust. The next day notice was

Marriages in Ireland.

The number of marriages registered in Ireland in 1904 was 22,961. The excess of births over deaths was 24,298, but this was more than offset by the emigration of 36,002 persons.

Cheap Coffins.

It is stated by the Irish Independent that coffins for children are being supplied by a contractor to south of Ireland almshouses at four cents each.

KILLS FRIEND OF MRS. THAW

Eminent New York Architect Killed by His Bitter Enemy.

New York, June 26.—Stanford White, the eminent architect, of the firm of McKim, Mead & White, was shot and almost instantly killed by Harry Thaw, a member of the prominent Pittsburg family, during the performance of the musical extravaganza Mamzelle Champaigne on the roof of the Madison Square Garden. White died before an ambulance could be summoned, and Thaw was arrested immediately after the shooting.

The Madison Square roof garden, which had been closed for several years, was crowded with a fashionable audience. While a Florida sextette was singing a song, and the garden was echoing with the laughter and applause of the audience, a series of shots rattled in the rear of the auditorium, and a man in evening dress was seen to fall across a table at which he was sitting with a party of friends. The man who had fired the shot fled, pistol in hand, toward the nearest exit, where he was seized and disarmed by the police.

Instantly the great audience was thrown into a panic, and a wild stampede occurred, during which chairs and tables were overturned and men and women fought with desperation to escape from the roof. The first intimation of trouble came when walking behind his seated victim, and drawing an automatic pistol he fired three shots.

White had been previously to the Manhattan club and had only been at the gar-

den a few minutes when Thaw attacked him. Thaw had been present during the entire performance. With a woman, said to be Mrs. Thaw, he had taken seats at a rear table. He was in evening dress, and his overcoat was thrown over the back of his chair. He got up every few minutes and walked about, and the spectators later recalled that he had acted very nervously.

The sextette of women on the stage had begun a song when Thaw left his wife, and walking rapidly down the aisle stood for a few minutes right behind White, looking at him hard. White apparently was utterly ignorant of his peril. Then Thaw quickly pulled a pistol from his trousers' pocket, and in quick succession fired three shots. Two took effect, either wound being mortal. White without a sound slipped down to the floor, the chair and table falling on top of him.

The curtain was rung down quickly. Several men in the audience rushed to White's assistance, but the physicians said he had died instantly. Immediately after the shooting Thaw pointed the revolver in the direction of the stage, and then swept it around toward the audience as if attempting to cover his retreat started for the exit. He was quickly disarmed.

While waiting for the car to come, Thaw's wife, who was Evelyn Nesbit, a member of the original Florida sextette, rushed up to him, threw her arms around him and declared: "I'll stand by you, Harry."

WILL NOT VISIT FALLS AGAIN.

A Honey Creek, Wis., Man Had a Thrilling Escape From Sudden Death.

Caught by the slack of his trousers, John P. Beem, a commercial traveler, hung suspended at a dizzy height over the Spokane Falls last Sunday afternoon when the bridge collapsed with a tremendous crash. A piece of twisted ironwork shot out and pierced Beem's clothing, leaving him uninjured, but hanging in an embarrassing position just over the brink of the roaring upper falls.

The bridge had been for some time insecure. Beem, who was from Honey Creek, Wis., was leaning over the railing admiring the plunging cataract. A street car passed at high speed behind him, and just as it reached earth again the bridge gave way.

Beem was later rescued by means of a block and tackle, which hoisted him away from his ludicrously dangerous position.

TO DETECT LEAK IN GAS PIPE.

Lather of Soap Much Better Than Using a Match.

The folly of hunting for a leak in a gas pipe with a lighted match is not so much because of the danger of an explosion as of other damage, as is shown by the experience of a West Philadelphia householder last week. One or two small leaks were detected by going over all the pipes and holding a lighted match to them. The smell of gas ceased, but was replaced a few hours later by the smell of burning wood. Another visit to the cellar showed a charred floor joist a little distance above a gas pipe. There was no apparent cause for this until a very close examination discovered that a tiny jet of gas was issuing from the pipe beneath the beam. It was lighted, but was so small as to be blue in color and nearly invisible. It had been lighted by the match used in the first investigation, but had not been noticed.

"If that leak had happened to be in a lead joint instead of an iron connection," said a gas man, "there would probably have been work for the fire department. The smallest possible jet of lighted gas issuing through lead will in time heat and melt the lead and make the leak larger, until a big flame is issuing. This may make a fire hours later, in the dead of night or at a time when no one is in the house. The only proper way to look for these very small leaks is to paint the suspected pipe with a smooth soap lather. Just as in the case of a bicycle tire, the tiniest leak will blow a bubble in the lather, and there you are."—Philadelphia Record.

Ninety Years in One House.

Charles Brown, of Lexington, Mass., who recently celebrated his ninetieth birthday, was born in the house he now occupies. He was the son of James Brown, who was also born in Lexington. His grandfather was Francis Brown, who distinguished himself in the famous battle of Lexington and was wounded on that memorable April 19, 1775.

MISS DEUCKERING AND HER MOTHER ARE INNOCENT

Hazel Deuckering and her mother have been declared innocent of the murder of Hiram Deuckering at the little farm south of Zion City that is, innocent so far as the coroner's jury was able to determine after its investigation of the evidence.

Deputy Coroner J. K. Bower and State's Attorney Hanna, much puzzled over the whole affair, like the jury now feel that the two women are innocent, they feel that not one particle of substantial evidence was produced in the inquest to show them guilty of the terrible crime.

Who then placed the poison in the cornmeal? "That girl is guilty (and coroner's jury did not believe she is) then she is the most deceptive woman the writer has ever seen. She is a pretty little maiden with a round, happy face which looks just the opposite from that of a person with mean instincts or desperate motives in her mind."

She says she cooked the gems, that nobody else was in the kitchen, that nobody touched the cornmeal but her; that she handed the gem to her father and later threw them to the chickens and dog. In no way did she try to shift the blame to anybody.

But still, she nor her mother could figure out how or why anybody should wish to kill her father, or either of them and the more one thinks of it the deeper the mystery becomes.

Knowing that she was suspected of the crime, the strain on the girl was terrible. After she had shaken hands with the coroner's jury yesterday, tears came to her eyes as she answered a few questions. She said she had been under the most terrible strain imaginable, adding:

"Only one who has passed through such an ordeal has any idea of what it is. I have not slept nights and have worried terribly because some persons have believed that I did it. Why it is terrible and I almost felt that I could not thru it all. I shall now follow the advice of my mother and if she wants me to remain here with her, I will do so. I would like to return to Ohio but if she doesn't want me to, I will not go."

Woman with Longest Hair.

Mercedes Lopez, a Mexican woman, is said to possess the longest hair of any person in the world. Her height is five feet and when she stands erect her hair trails on the ground four feet eight inches. The hair is so thick that she can completely hide herself in it. She has cut it very frequently, as it grows quickly, enabling her to sell large tresses to hair dealers every month.

King Defies Anger.

King Alfonso defies anger. He will be married on a Friday.

THE WORLD OVER

LATEST NEWS FROM EVERY LAND.

SUMMARY OF NEWS.

Harry Shaw, son of the Pittsburgh steel millionaire and husband of Evelyn Nesbitt, the actress, killed Stanford White, a well-known architect, in Madison Square Garden, New York, during a performance, firing three shots, which almost caused a panic in the large crowd.

In the overturning of an automobile in Coconino street in Pasadena, Cal., while it was being driven at the rate of sixty miles an hour and the subsequent explosion of the engine and burning of the machine Mrs. J. J. Cordori, 28 years of age, was pinned under the machine and roasted to death.

Mrs. Emma Ledoux, who has been on trial in Stockton, Cal., for killing A. N. McVicar, whose wife she represented herself to be, by giving him poison last March and placing his body in a trunk to take the remains out of the city, was found guilty of murder in the first degree, the penalty for which is death.

Three masked men entered the general store of Crull Bros., in which the post-office is located in Oseola, Ind., stealing stamps, cash and much booty, which was hauled away in a carriage. The villagers were aroused by a burglar alarm and six residents fired twenty or more shots at the robbers, wounding one of them.

East-bound train No. 6, the "Twin City and Chicago special," on the Great Western railway, was wrecked early the other day. One of the cars jumped the track at a bridge one and a half miles north of Gladbrook, Iowa. While running on the ties the train passed over the bridge safely. After reaching the other side four coaches were overturned.

A team of horses hitched to a wagon loaded with twenty quarts of nitroglycerin ran away north of Knightswood, Ind., and was not stopped until it had run for seven miles through a thickly populated country, but the deadly fluid did not explode. The horses took fright at two fighting dogs. Once the wagon was overturned, but it was straightened out. Terrified farmers who saw the runaway team jumped fences and ran to the woods or by telephone warned others of its coming. Wallace Apple, a farmer, stopped the runaway before he saw the danger sign on the wagon.

Charged with the murder of his wife and having made a complete confession of his crime to the local police, William Brash of Rochester, N. Y., was arrested in Cleveland. With Brash there was arrested Mrs. Mary Gilmore, with whom he is alleged to have eloped. The body of Brash's wife was found in the canal at Rochester and suspicion at once turned to her husband, who disappeared. Brash confessed the murder to the local police, the latter say, and told them that he killed his wife because of love for the Gilmore woman. The latter is a good-looking widow about 23 years old.

Following is the standing of the clubs in the four principal baseball leagues:

BREVITIES.

Chicago high school graduates this year aggregate 1,169, a decrease of eighty, as compared with 1900. Statistics show the high schools are at a standstill.

The large warehouse in East Hartford, Conn., belonging to W. L. Hunting & Co. and containing 2,500 cases of tobacco was burned. The loss is about \$50,000.

Miss Fanny L. Fuller, youngest daughter of Chief Justice Fuller, surprised friends in Washington by marrying Dr. Robert F. Mason weeks before the date originally set.

Five ice dealers representing local companies were sentenced in the Common Pleas Court in Toledo, Ohio, to pay a fine of \$5,000 each and each man to serve one year in the workhouse.

Commander Booth-Tucker and Miss Minnie Reid were married at the Salvation Army's chapel, South Tottenham, London. Gen. Booth officiated. Only relatives and high officers of the army present.

The first prison terms ever imposed in the United States in railroad rebate cases have been passed upon two men in the Kansas City prosecutions. Packing companies and the Burlington railroad were fined.

Miss Laura Kelly died from the effects of overstudy during a four years' course at Pillsbury academy, Owatonna, Minn. In the midst of her graduating address she became violently insane. She was taken to her home, but never rallied.

While standing in the front yard of her home at Tennyson, Ind., Mrs. James Bristow, aged 30 years, was struck by lightning and fatally injured. Mrs. Bristow is the daughter of W. N. Harding, who the previous night shot and killed his wife and himself.

John Collins, aged 23 years, and his sister, Clara Collins, aged 11 years, were drowned in Terhush lake, three miles from Fenton, Mich., when one of the two rowboats in which Mrs. Selma Collins, her nine children and hired man, George Crowler, were gathering water lilies, capsized.

LOCK RAIL WINS.

PRESIDENT IS UPHELD BY THE SENATE'S VOTE.

Long Fight on Type of Waterway Ends in Favor of Quickest Plan—Work Now to Be Rushed with Increased Force.

Washington correspondence:

Every resource of the nation is now to be directed toward making the dirt fly on the Panama canal as a result of the Senate's action in declaring for the lock type, favored by the President and the House of Representatives. The vote was 36 to 31, giving the lock type the majority of five claimed for it by President Roosevelt some time ago. The action of the Senate sets at rest all uncertainty, and the force in Panama is expected to be doubled in a short time. The entire Panama commission will soon leave for the zone, and Chief Engineer Stevens will accompany them.

"Cut loose how and build the canal. The American people want results on the isthmus as soon as they can be obtained, and I want them. Dig, dig. Congress and the people are behind us in our efforts."

Within forty-eight hours after the completion of the Panamanian canal legislation President Roosevelt issued in effect the above order to Chairman Shonts and Chief Engineer Stevens. The President expressed his great gratification at the action of the Senate in supporting his plan, and it is announced

FACTS ABOUT THE CANAL.

Estimated cost of the Panama canal, \$200,000,000.

Amount paid French company for title, \$10,000,000.

Amount paid Panama government for perpetual lease of canal lands, \$10,000,000.

Length of canal, forty-six miles. Canal width varies from 250 to 500 feet at the top, the bottom width being 150 feet.

There will be five twin locks of concrete masonry, each 738 feet long and eighty-two feet wide, with a lifting capacity of thirty to thirty-two feet.

Lake Bohio (artificial) covers thirty-one square miles.

Ahajuela lake (artificial) covers 5,000 acres, about nine square miles, and will furnish motive power for operating the locks and lighting the canal from ocean to ocean.

Distance from New York to San Francisco by old route, 13,714 miles; by the route through the canal, 5,260 miles.

Distance from New York to Manila by present route via San Francisco and Yokohama, 19,530 miles. Distance from New York to Manila by Panama canal via San Francisco and Yokohama, 11,585 miles.

Distance saved in a sailing trip around the world by the new route through the Panama canal, 2,708 miles.

The Panama canal was practically begun in 1883 by the French company. They had completed about two-fifths of the length, when because of fraudulent management the company failed, and the work ceased in 1889.—Woman's Home Companion.

speedy action toward the actual completion of the canal. The claims made in favor of a canal with locks are strong. A waterway of this pattern can be constructed in less time than would be required for one at sea level. Secretary Taft estimates that it can be made ready for operation by 1914. A

bor, the canal will be excavated for twenty-four miles through the marshy lowlands of the Chagres River to Bohio. So far it will be at sea level. At Bohio a mighty dam will back up the waters of the river for twenty miles, forming a huge artificial lake, through which vessels will pass as part of the canal for thirteen miles. Vessels will

IVENS IS HANGED.

Confessed Slaying of Mrs. Hollister Executed in Chicago.

Richard G. Ivens was hanged Friday in Chicago. His life paid the law's penalty for the thrice-confessed murder of Mrs. Bessie M. Hollister, Jan. 12, Trembling in every limb, the youth marched

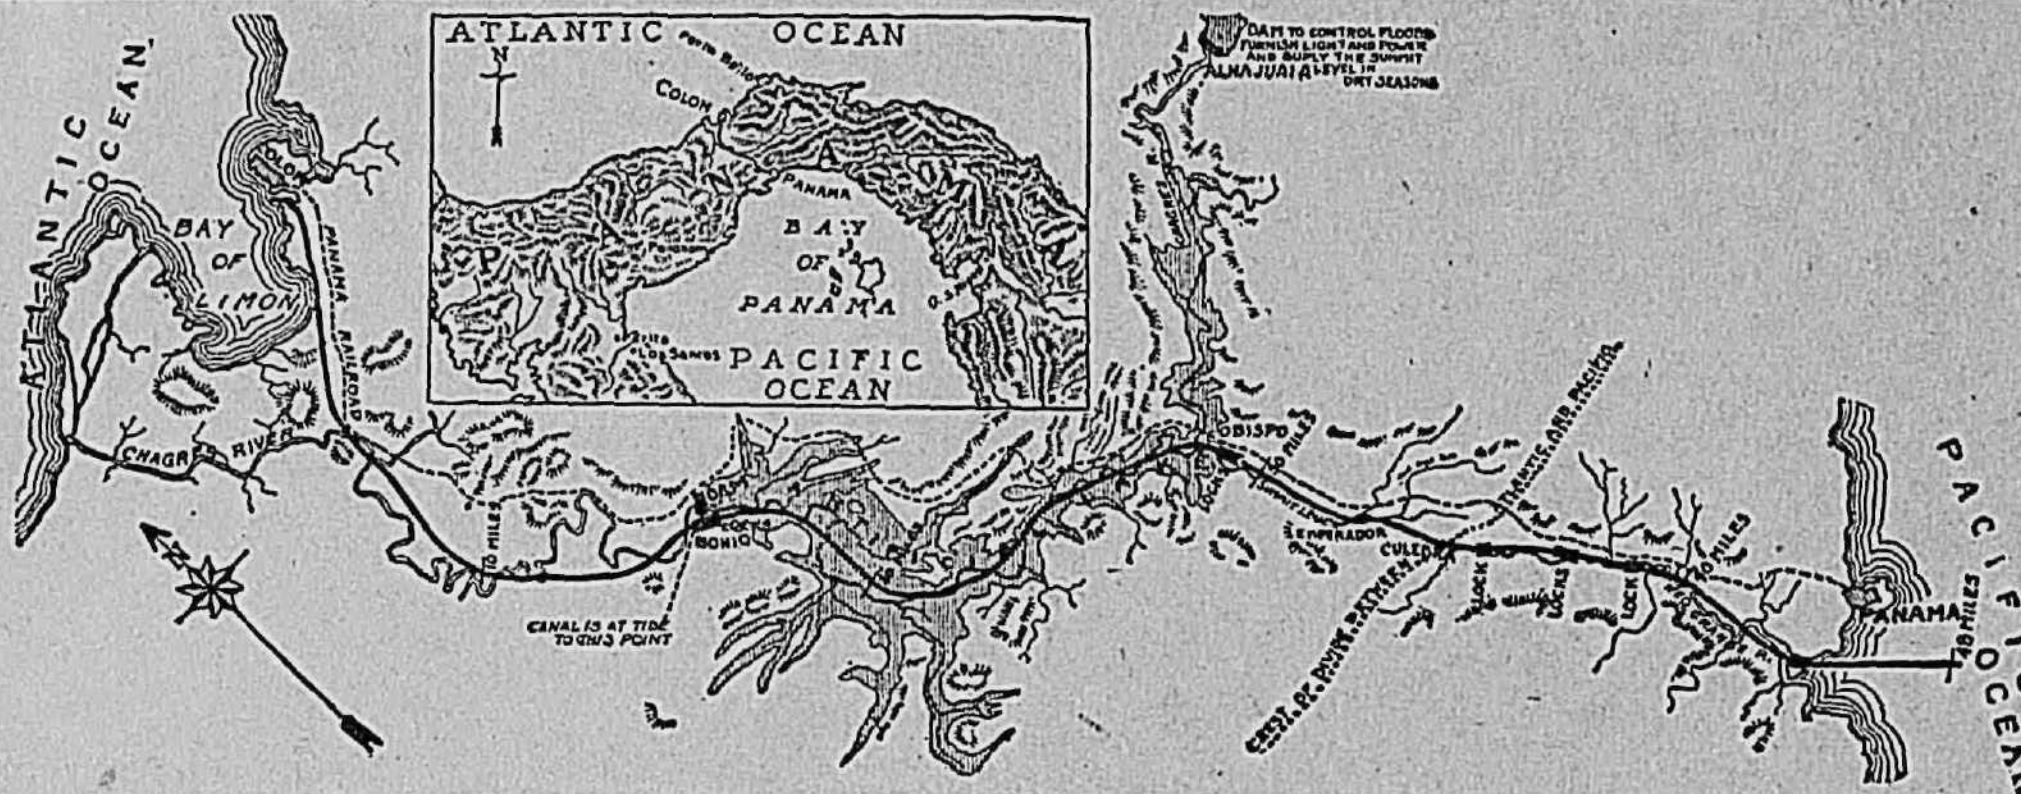

WEST END OF CULEBRA CUT.

pass through two great locks each lifting a ship about forty-five feet. From Obispo the canal route runs through the mountainous backbone of the isthmus, and for nearly seven miles a vast cut has to be made through this backbone of rock.

For the first five miles this is called the "Emperador" cut. Then comes a mile and a half of the "Culebra" cut. The greatest depth of this cut, from the hill summit to the bottom of the canal, is about 250 feet. The amount of rock and earth to be removed in the seven miles of excavation through the

to the gallows. The rope was adjusted, the trap sprung, and his neck was broken by the fall. There were few witnesses to the execution. Physicians, necessary officials and newspaper reporters were the only spectators in the jail gallery. The parents and immediate friends of the youth were even denied the privilege of speaking to him before he walked to his fate.

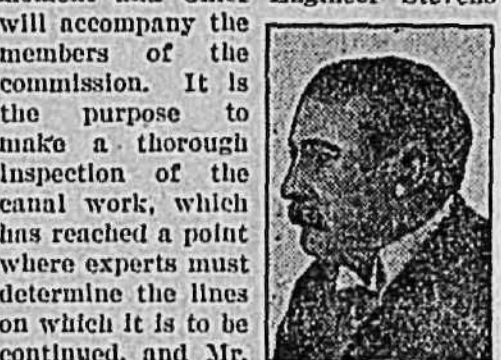

Mrs. Bessie M. Hollister was murdered on the evening of Jan. 12 near the carpenter shop owned by William Ivens, father of the murderer, 308 Belton avenue. The body was found next

ROUTE OF THE GREAT PANAMA WATERWAY LINKING THE ATLANTIC AND PACIFIC OCEANS.

that before the summer is far advanced as many men and as much machinery as profitably can be employed will be engaged in making the dirt fly on the canal route.

Promptly upon being advised of the result of the vote in the Senate Mr. Shonts called on Secretary Taft at the War Department and began to discuss the plans of the commission for the prosecution of the great work of the canal construction. It was decided that the commission as a whole should start for the isthmus at the earliest possible moment and Chief Engineer Stevens will accompany the members of the commission. It is the purpose to make a thorough inspection of the canal work, which has reached a point where experts must determine the lines on which it is to be continued, and Mr. Stevens desires that JOHN F. STEVENS, full approval shall be had of his own plan before the work shall progress further.

The majority of the Senators appear to have thought that where the weight of the opinion of government experts and of the men who must bear the responsibility for the success of the enterprise, including President Roosevelt, was so decidedly in favor of a lock

canal will be cheaper to construct than one at sea level, while as regards safety and permanence it is asserted that the danger of landslides in the great Culebra cut will be much less in a canal of the lock pattern than in one wherein the excavations would have to be made much deeper.

Now that this important question has been settled the administration will be free to go ahead as rapidly as possible with the actual digging operations. It can proceed immediately with the preparation of plans for the outlay of the \$26,000,000 which the civil appropriation bill provides to defray canal expenditures. The time and occasion for discussion have passed. The time for the full elaboration of details and for actual work has come. If Secretary Taft's optimistic forecast is correct, ten years hence the commerce of the world will be passing between the Atlantic and the Pacific through the canal.

Outline of the Work. The Isthmus of Panama is in shape much like an elongated letter S laid on its side. Its general direction is east and west. At the canal zone the isthmus is forty miles wide in a direct line; but the canal can not be built on a straight line, having several curves to accommodate itself to mountain spurs.

A popular error is that one ocean has a higher level than the other. This is wrong, but there is a difference of

Emperador and Culebra cuts is estimated at 43,000,000 cubic yards.

These cuts terminate at the southeastern end of the summit level created by the Bohio dam, at Pedro Miguel, thirty-eight miles from Colon. At this point, it is thought, there will be two double locks, which will bring the level of the canal down to about twenty-eight feet above mean sea level. A mile and a half further on toward the Pacific is Miraflores, where there will perhaps be another double lock, which will let vessels down to the level of the Pacific.

Commercial Event of the Age. By dividing a hemisphere, man will create a new commerce of the world, and bring the countries of both sides of the globe into closer relationship. Next to girdling the globe with submarine cables, therefore, this work of cutting through the Isthmus of Panama will prove, it is hardly too much to say, the most important commercial event of the age.

The annual cost of operation will be about \$2,000,000, but it is expected to yield a revenue in tolls of nearly \$10,000,000. The revenue producing functions of the canal will be minor as compared with its services in promoting the industrial and commercial progress and general welfare of the United States. But while we speak of its commercial and political advantage to the United States, we must also remember its worth to the world and to the progress of civilization.

Survived Awful Disaster.

W. N. Goodrich of Menominee, Mich., is one of the few survivors of the great disaster of April 27, 1895, when more than 1,400 exchanged prisoners returning to the North on board the steamer Sultana were killed by the explosion of the vessel's boilers in the Mississippi river near Memphis, Tenn. A bomb, it is supposed, had been placed in the coal. When the explosion came, Goodrich was thrown into the river. He clung to a piece of wreckage and floated for some miles, finally drifting into an eddy which carried him beneath an overhanging tree. Seizing the drooping branches he was enabled to draw himself to safety. Although it is nearly half a century since the explosion took place, Goodrich has never been able to forget the awful horror of those fatal moments.

2,000 Telephones in Store.

Within the new Wauwaukegan store at Philadelphia, which is only one-fourth completed, 2,000 Bell telephones have already been installed, and 1,000 more are soon to follow. It will be, when completed, the largest store phone system in the world. Twelve operators will operate a switchboard, from which will radiate within the store 10,000 miles of wire. Every instrument has an automatic coin box attached, so as to minimize the customer's trouble. It is estimated that 6,000,000 messages will pass between Wauwaukegan and the Bell central offices in one year.

morning on a refuse pile outside a stable adjoining the shop. Richard Ivens was arrested a few hours after and under cross-examination by Assistant Chief of Police Schuetzler and Inspector Lavin he broke down and confessed, giving all the details of the crime.

Mrs. Hollister was the fourth woman murdered within a period of five months, the first having been Mrs. Elizabeth Mize, who was killed near Del Prado Hotel, Aug. 22, 1905, and whose murderer is still at large.

The details of the crime committed by Ivens were so revolting that the whole city was aroused to action. Mass meetings were called in every section, anti-crime associations were formed and a campaign for an increased police force started. In order to make the increased police force possible a crusade to raise saloon licenses to \$1,000 was started and after a bitter struggle was carried.

RICHARD G. IVENS.

In order to make the increased police force possible a crusade to raise saloon licenses to \$1,000 was started and after a bitter struggle was carried.

Loss to Meat Packers \$150,000,000.

Reports from various meat-packing centers indicate this industry has suffered a loss of \$150,000,000 on account of the crusade against doctored meats. Chicago packers have had a full-page advertisement in the local papers inviting the people of the United States to inspect their plants. Nevertheless, improvements ordered by the city authorities will cost the packers \$1,000,000.

Ship Trust Shows a Profit.

The report of the International Mercantile Marine Company shows an increase in gross and net earnings, leaving a surplus of \$2,920,080. The company carried one-quarter of all the passengers between this country and Europe and half of the first-class passengers.

CONGRESS

The Senate Thursday declared for a lock canal across the Isthmus of Panama by a vote of 36 to 31. The remainder of the session was devoted to the discussion of the amendment to the sundry civil bill appropriating \$25,000 to pay the traveling expenses of the President, and the subject was not disposed of. The conference report on the fortifications appropriation bill was agreed to and the House bill authorizing the city of St. Louis to construct a bridge across the Mississippi river was passed. Before taking up the pure food bill the House discussed the conference report on the naval appropriations bill. By a close vote the conferees were instructed to concur in the Senate amendment providing that the type, displacement and tonnage of the proposed record-breaking battleship must be reported to Congress before any bids for her construction are accepted. Several minor amendments also were accepted, and then the report was disagreed to, the conferees being reappointed. The pure food measure then occupied the attention of the members until the end of the session, Mr. Mann (Ill.) speaking.

The Senate Friday passed the House bill appropriating \$25,000 for the traveling expenses of the President, the amendment to this effect being taken from the sundry civil bill. The latter measure also was passed, the provisions prohibiting canteens at soldiers' homes and authorizing the lock canal at Panama being retained. A resolution expressing sympathy with the Russian Jews on account of the recent massacres was adopted. A measure appropriating \$3,000,000 for the purchase of lands in the White and Appalachian mountains for forest reserve purposes was passed. The Senate also accepted the conference reports on the District of Columbia and postoffice appropriation bill. Pure food held the attention of the House throughout the day, but a vote on the measure was not reached. The leading lawyers debated the constitutional features of the bill, the Democrats dividing on the question of State rights.

The Senate Saturday sent the agricultural appropriation bill with the meat inspection rider to conference after considerable debate. Senator Long introduced a resolution calling upon the Attorney General for information concerning the suits brought by him under the anti-trust laws, but action on it was postponed. The sundry civil appropriation bill also was sent to conference. A bill was passed creating the Mesa Verde (Cliff dwellers) national park in Colorado, and a number of other measures to which there was no objection were put through. In executive session the appointment of Benjamin F. Barnes, assistant secretary to the President, as postmaster at Washington was confirmed by a vote of 83 to 10. The pure food bill was passed by the House, the vote being 240 to 17, and the conference report on the railroad rate bill accepted, 210 to 4. Two other conference reports were adopted—on the District of Columbia and postoffice appropriation bills—which passes these measures. The sundry civil bill was sent to conference. The report of the Committee on Election No. 2, seating Harry M. Conroy as a member from the Twelfth Congressional District of Missouri, was adopted. The House also passed a resolution that M. L. Brooks is entitled to the seat for the second congressional district of Texas.

The Senate Monday adopted the resolution of Mr. La Follette providing that the investigations of the Interstate Commerce Commission be extended so as to include the grain business. The Long resolution calling upon the commission for information concerning the suits brought under the interstate commerce, Sherman anti-trust and Elkins laws was accepted. The pure food bill was called up and it was voted not to concur in the House amendments. A request from the House for a conference was agreed to and Messrs. Hepburn, McCumber and Latimer appointed conferees. The conference reports on the bill relative to the control and regulation of the waters of Niagara River and military academy appropriation measure were accepted. The rate bill was taken up and Senator Tillman spoke in opposition to the pipe line provision, which, he said, "showed that the Standard Oil had got in its work." The report of the conferees was not disposed of, but it was made evident that another conference will be ordered. About 300 private pension bills and a measure prohibiting shanghaiing in the United States were passed. The immigration bill was discussed for three hours in the House and passed without a yeas or nays vote being permitted on any of the paragraphs. The head tax of \$5 prescribed in the original bill was changed to \$2, and as a substitute for the section relating to the educational test an amendment providing that the matter be submitted to a commission was passed by a close vote. The most important features of the measure were thus eliminated. The House insisted on its amendments to the pure food law bill and asked for a conference. A conference report on the naval appropriation bill, leaving only one item in disagreement, that relating to the transfer of the naval station at Port Royal, S. C., to the Rhode Island station, was adopted, and the conferees instructed to insist upon the transfer. The general deficiency appropriation and omnibus public building bills were reported. At 5:35 p. m. a recess until 8 o'clock was taken, and a night session of three hours devoted to oratory followed, the discussion of the bill to simplify the law relating to the collection of revenues being the order of business.

In the National Capital.

The bill providing for the control of the waters of Niagara river was passed by the Senate.

The present army retirement law for officers and enlisted men requires thirty years' service to entitle persons retiring under it to three-quarters pay. The Senate passed a bill allowing officers and enlisted men credit in computing their service for any service they may have had in the navy or marine corps. The House committed on military affairs authorized a favorable report on this bill.

PIER OF THE PANAMA RAILWAY.

canal, their opinion should be accepted as conclusive.

The public generally, while recognizing the force of the arguments on both sides, has been content to leave the question of the canal's type to the judgment of Congress. Now that that body has spoken, its chief desire will be for

eighteen feet in the height to which the tides rise on the two sides of the isthmus. Hence, even if the canal were made at sea level, guard locks would have to be built at each end. It has been proposed that there be five twin locks of concrete masonry along the canal route. Beginning at Colon har-

Geese and pigeons pair, but ducks, turkeys and chickens do not.

A little oilmeal in the stable will assist the cury comb, but it will not take its place.

Now, honor bright, is there any good reason why a farmer should not grow plenty of strawberries for home use?

Keep fresh lime scattered around hog pens, feeding pens and troughs. It is one of the best and cheapest disinfectants.

The man who is most benefited by what he has heard and learned at farmers' institutes is the one who puts them in practice.

Pork is what we make it. There is as much in the feed as in the breed, doubtless, when it comes to producing wholesome and good-flavored meat.

Borrowing money and borrowing trouble are two different things in the beginning, but they are very similar when it comes to paying. Then it usually amounts to the same thing.

"Any old place" never was a good place for a garden. More gardens are located there than anywhere else. Should this be the selection the yield ought to be "any old kind of a yield."

The present outlook seems to promise a practical milking machine. Two different machines are being given a thorough test and the reports are very promising. None of these machines are at present on the market.

The mortgage is going—to stay or be removed, according to the efforts put forth. It is going to stay when robber cows, loafer hens, unthrifty hogs, diseased sheep and poor seed are kept. The question is what will be done with the mortgage?

A train boy sold an old farmer some bananas. They did not suit his taste and he threw them away. When the boy returned the old farmer asked him if he had any Ben Da's apples. He wanted to eat a few to take the taste out of his mouth.

For starting early tomato and other plants in house or hotbed, use sod cut in three-inch cubes or old tin cans, with solder melted off, or little paper boxes, which have only to be wet when placed in the ground. Transplanting can then be done easily without checking the growth.

Nothing is more amusing than to see a man backing out of an individual hog house with an infuriated sow as the assailant. There is a sort of dexterity that is unusual to say the least. The doors of such pens should be made so one can enter easily and get out suddenly in case of an attack. With some sows it is a good plan to carry with one a hand hurdle.

It is the general opinion among hen men that the hen that hides her nest is more successful than the hen that does not. Should a hen hide her nest and come off with a large brood of chicks she is held up as being all right, but nothing is said of the thousands of hens that hide away and are never found again. This probably gives rise to the saying that the hen that hides her nest is always successful.

Yellows must be reckoned with by the peach grower as one of the troubles he will have to fight. Its cause is not yet known, and no cure for a true case of yellows has yet been found. Growers who have not studied the symptoms of this trouble often class all trees with a yellow foliage as "yellows" trees, and then say that with proper treatment a large number of yellows trees will recover. Yellow foliage is only one symptom of the disease, and the one least dependable.

Where possible to do so, the preparation of the potato ground should begin two or three years previous to the year of growing the crop. It consists in keeping the soil clean so there will be few weeds to contend with in potato cultivation. Sheep and calves are good agencies to use in cleaning potato ground. A clover pasture or an old pasture of any kind will supply an ideal potato plat and should be plowed in the fall. Potato ground plowed in the spring should be plowed late.

Many Soils Need No Bacteria. The Department of Agriculture after many tests of soils finds that there are many that need no inoculation in order to fit them for growing alfalfa and other leguminous crops. Bulletin No. 240, issued by the department, fully explains this whole matter of nitrogen culture in regard to soils and growth of legumes. It is a valuable bulletin.

Referring to the erroneous impression abroad on this subject, Prof. C. F. Curtiss, of the Ames, Iowa, Experiment Station, in a recent circular on the subject, says:

"Barnyard manure and thorough tillage are worth more than all the nitrogen cultures on the market. Put the soil in good enough condition to grow

seventy-five bushels of corn per acre; then sow twenty pounds of alfalfa seed about the middle of August, following a crop of small grain, and the question of cultures will take care of itself."

Artichokes Valuable Crop.

The value of artichokes is not generally understood. Last spring a Missouri farmer planted nine bushels of the tubers on three-quarters of an acre and in the fall harvested 800 bushels. This would make 400 bushels to the acre. Some years ago this farmer raised 600 bushels on one acre, with but very little cultivation. Not only do they make the cheapest, but in many respects the healthiest hog feed grown, being a natural specific for cholera. Once planted, the hogs will do the harvesting, and after the first year there will be no necessity for planting. Some think that artichokes can not be exterminated, but this is easily accomplished by letting the tops grow about a foot high and then plow them under. But why exterminate a crop that will bring you \$25 to \$35 worth of hog feed every year without the trouble and expense of planting or harvesting?

Overfed Chicks.

In case you have overfed chicks on too much starchy foods till diarrhea has resulted, the following ration has been found beneficial in correcting the trouble:

Brass three parts by measure, corn meal two parts, cut clover two parts, meat meal one part. Let the birds have access to this at all times. Feed roots and cabbage, all they will eat, and one full feed of whole grain an hour before they go to roost. Let this be wheat one night, barley the next, corn the third, and then go over the list again. Give no medicine. Deep litter for exercise in getting the grain, with fresh water several times a day. When the animal supply of food has been too small the birds fill up constantly on starchy foods, overtaxing the liver and digestion. Diarrhea and breakdown are the natural outcome of this method of feeding. Growing birds will stand high feeding, but when a bird has reached maturity more careful feeding is required.

Small Fruit Farm.

Small fruit culture will bring the family bigger returns than anything else about the farm. Knowing this, it is strange that so many country people prefer to buy dried fruits rather than grow them right in their own gardens. Any soil that will produce a vigorous growth of corn and potatoes will be all right for fruits. The currant is one of the most valuable of our small fruits. It is hardy, easy to cultivate and yields abundantly. Good cultivation and severe pruning will increase the size of the fruit. Plenty of old manure should be spread in about the roots, and the soil should be kept clean and mellow. On account of its hardness the currant bushes are too often left to shift for themselves, and of course when left in this condition one need not expect big, fine-flavored fruit. Currants do best in a somewhat protected location.

The gooseberry bushes are also shamefully neglected, until blight and disease destroy the prospect of a crop. With sensible care, such as pruning, cultivation and the use of fungicides, the culture of this fine fruit may be made certain and even remunerative. So many of the best varieties are affected with mildew, that no one who expects to get well-developed fruit should neglect spraying.—Southern Fruit Grower.

Selecting Seed Corn.

The experiment station of Ohio furnishes valuable information in a bulletin on the selection of corn for seed, the selection being made during the growing of the plant in the field, which ought to have the careful attention of growers of corn everywhere. Taking Dent corn for the purpose, it is scored as follows: Vigor of plant, 20 points; position of ear, 5 points; weight of ear, 50 points; length of ear, 5 points; uniformity of plant and ear, 10 points, and shape of kernel and size of germ, 10 points.

Very important is the note which gives the disqualifications, as plants growing under less than normal stand; plants lying upon the ground or badly broken; plants diseased; plants maturing too late or too early. To select the seed corn from such plants is fatal to the following crop. The vigor of the plant is indicated by the circumference of the stalk below the ear; by its upright growth and by its leaf development and freedom from disease.

The ideal position of the ear is such that it does not pull too heavily upon the plant. The weight of the ear is to be determined by scales when the ear is thoroughly air-dry.

The plan of uniformity of plant and ear is based on the habit of growth and vigor of plant as well as size, shape, color and indentation of ear. Corn growers everywhere should profit by these points, which will mean decidedly improved crops.—Exchange.

Granary with Elevator.

Here's a plan of granary to hold 3,000 bushels of grain; the walls are of stone, and an elevator is arranged to work by horse power. A granary to hold 3,000 bushels will require to be 22 feet by 38 feet inside. This will give six bins, size 15 feet by 7 feet, and 6 feet high. This will also allow for a passage across the middle of the building 8 feet wide, which will give access to all of the bins and can be used for cleaning grain, as well as storing small implements. The floor should be raised four feet from the ground to make it dry and convenient for loading grain, as well as to provide for the elevator, and belting below the floor. The walls being of stone, should be 13 feet high; this will provide for 4 feet below the floor, one foot for floor, then 8 feet to

GRANARY WITH POWER ELEVATOR.

the plates; this will give one foot clear over the bins. There should be a stone center wall lengthwise under the floor to carry the floor joists, which will be 12 feet long and match on middle wall. To give head room over the top joists the roof should be a third pitch.

Following is the required material:

1,250 feet roofing, one inch.

1,070 feet flooring, inch, to be laid double.

50 joists for floor, 2 inches by 12 inches, 12 feet long, 1,000 feet.

10 joists over head, 2 inches by 2 inches, 24 feet long, 610 feet.

650 feet lumber for bins, one inch.

20 studs, 4 inches by 4 inches, 8 feet long.

13 squares shingles.

150 feet inch lumber for doors.

40 rafters, 2 inches by 6 inches, 16 feet long.

To arrange an elevator for horse power, a hopper that will hold at least 50 bushels should be sunk in the floor close to the door and at one side to empty grain for the wagon. The elevator is an ordinary built elevator with buckets standing upright and in the rear corner of center bin. The box at bottom of elevator must be close on the ground to be connected with the delivery hopper by a spout, with sufficient slope that the grain will run freely. The elevator will discharge well above the upper joists into a hopper in the center of the building, to which a funnel-shaped spout is attached, that can be shifted to deliver into any of the bins. The horse power should be placed at the end of the granary, and driven by a belt or shaft, passing through an opening in the wall left for the purpose. The details can be all worked out by a mechanic, one essential is to have plenty of slope for the delivery hopper to box at foot of elevator, even if it should be sunk into the ground a little.—Montreal Star.

For Calloused Shoulders.

A farmer in North Dakota gives his method of treatment and cure of calloused shoulders of work horses in the Dakota Farmer, which he says he has used with uniform success, as follows:

"I cut a slit in the front part of the collar opposite the callous, then cut another slit at right angles across the first one. I then take out enough of the filling to allow for callous. After soaking face of collar in warm water I lay the front part, where cuts have been made, on a plank or something solid, and pound face of collar where it presses on callous, with round-faced hammer, till a sufficient hollow has been made. This plan will work whether collar has been used with or without pad. Then when the horse comes in from work I bathe the callous in water as hot as can be borne and paint with iodine. You will find this plan worth trying, and I will guarantee the collar will not be injured."

Alfalfa Seed.

The constantly increasing acreage of alfalfa and the high price of seed make purity and germinability of the latter of the highest importance. Bulletin No. 133, just issued by the agricultural experiment station, Manhattan, Kan., treats of alfalfa seed and the various impurities and defects to which it is liable. The methods of testing available to farmers and seedsmen and more elaborate ones practiced at the station are described in detail. The bulletin is lavishly illustrated and may be obtained free on application.

Preventing Cedar Rust.

The disease called cedar rust, which spreads to apple trees from cedar apples, commonly carried on cedar trees, and pasture savins, has been investigated at the Nebraska station with the conclusion that spraying with bordeaux mixture will keep the disease in check, making the application when the cedar apples on cedar trees show the orange color, followed with another spraying ten days or two weeks later. It is also recommended to destroy cedar trees or at least to get out the cedar apples for

a considerable distance around the orchards. Where spraying is carried on for apple scab, etc., the same spraying would answer for the rust.

Watch for Seed Adulterations.

The work of different experiment stations has shown that a large number of foreign seeds are contained in clover and alfalfa seed, including the dodders, which are so destructive to alfalfa, and a large number of bad weed pests like the narrow plantain, wild mustard and a host of new weeds.

One impure sample of last year's supply contained thirty-two species of foreign seeds, including both species of dodder, the plantains, many common weeds, three species of Western weeds that are new in Ohio and as many European weeds that have been heretofore unknown in this State. At least a dozen new weeds have been introduced into Ohio in alfalfa seed during half as many years.

While this is unacceptable it is still more so to get only black medick (yellow trefoil) plants as many have done, where supposed alfalfa seed was sown. In these times of high-priced seeds there is temptation to adulterate with cheap seeds like the black medick, etc., which have very slight value as forage plants with us; there is like disposition to offer seeds with many weed seeds, at low prices. Both these dangers are real. Intending purchasers of such seeds will do well to be assured of their quality.

Shipping Hay to Dealers.

During the last two years a number of rogues in different sections of the country have been offering a considerable advance on the market price of hay and thousands of tons have been shipped to these people for which the producer received little or no return. With hay, as with other articles of farm produce, it is usually best to sell it as near home as possible. In every farming center there are reliable dealers who will pay a fair price for such products and pay spot cash for them. True, they sell them at an advance, but it is almost impossible for the grower to reach these outside sources of demand, hence he can better afford to let the local dealer make a dollar or two than he can to take any chances in shipping himself, and especially to people of whom he knows nothing. The writer yearly sells his surplus hay to a local livestock dealer and gets the cash on delivery. Opportunities offer to bale it and ship to the city at an advance on the local price, but we have figured that our labor, time and element of risk in the latter proposition is not warranted by the higher price, so we "let well enough alone," and it generally pays to do this.—Indianapolis News.

Outlet for Drain.

One of the most common as well as most efficient protections for the outlet of a main drain is a plank box with wire bars placed vertically across the

DRAIN OUTLET.

end about two inches apart. Such a box should be made of 2-inch plank, 12 feet long and large enough to admit of the insertion of the tile into the upper end. A protection of this kind serves a double purpose. It prevents small animals from entering the drain and will not be damaged by frost.

Smoking Meat.

The best fuel for smoking meats is green hickory or maple wood, smothered with sawdust of the same material. Hardwood of any kind is preferable to soft wood. Resinous woods should never be used, as they are likely to impart bad flavors to the products. Corn cobs are the best substitutes for hardwood and may be used if desired. Soft woods and corn cobs give off large amounts of carbon in burning, and this is deposited on the meat, making it dark in color and of rank flavor. Juniper berries and fragrant woods are sometimes added to the fire to flavor the meat.

Grubs in Backs of Cattle.

Grubs in cattle are caused by the gnat depositing its eggs on the backs of cattle, and the young larvae, after issuing from the egg, bore its way through the animal's skin and remains lodged in the cellular tissue until it attains maturity. The grub may be detected by a swelling of the skin of the animal. The swelling should be squeezed, which will cause the larvae to be ejected. If it is not easily removed, a small opening should be made in the skin with a sharp-pointed knife, and the larvae may then be extracted with a curved needle.

Thunder Storms and Sour Milk.

The primary cause of sour milk is the growth of certain bacteria that are always very numerous in the air and cannot be kept out of the milk. These are most abundant during damp, heavy weather, which usually accompanies thunder storms; as such weather is particularly favorable to their development. Hence, the popular notion that thunder storms make milk sour.

Horse-Eating in Germany.

Germany ate 90,884 horses in 1905, which was 15,622 more than in 1904. Also 407 more dogs were eaten, not counting the careful statisticians add, those dogs which were slaughtered privately for table use.

A NEW STAR IN THE FIRMAMENT.

—Indianapolis Star.

MILLIONAIRE A MURDERER.

Harry Thaw Kills Stanford White in New York.

Stanford White, a well-known New York architect, member of exclusive clubs and prominent in society, was shot and instantly killed by Harry Kendall Thaw, member of the Pittsburgh family of millionaires and husband of Evelyn Nesbit, the actress, at the Madison Square Roof Garden Monday night.

Mr. White was an old friend of the Nesbit family and was instrumental in procuring a position on the stage for Evelyn, when she came to New York years ago and served for some time as an artist's model.

It was near the close of "Mamselle Champagne," a musical comedy, with which the garden was opened, that Thaw approached the table at which White was seated with another man and fired three shots from an automatic revolver into the breast of the architect.

Thaw was arrested without making any resistance after he had dramatically assured the terrified audience by gesture that he would shoot no more and had emptied his weapon of cartridges. He was locked in the West 30th street police station, where he made a statement that the death of White was deserved for many reasons.

There is no doubt that jealousy, amounting almost to an insane hatred, was responsible for the deed. In his statement Thaw mentioned several times the name of his wife, coupling this with characterizations of White that he was a blackguard and a scoundrel.

Mrs. Thaw was on the roof at the time of the tragedy. She had only time to rush out as the special policeman was leading her husband away a prisoner and throw her arms around his neck, crying hysterically, "Oh, Harry! Harry! Harry!" when she collapsed and was taken away by friends.

The throng in the theater was near a panic. That there was no disaster was due to the scene that was then on the stage, to the coolness of Lionel Lawrence, the stage manager, to several men in the audience and to attaches.

The limelight of the scene prevented all from seeing the tragedy. The detonating reports of the revolver so much resembled a firecracker that few received the first alarm. Then it was that Mr. Lawrence and the others, springing up everywhere, called upon all to remain in their seats, as there was no danger, while others covered the body of White with their coats and clothes. The performance was at once concluded, but the audience passed out without giving evidence of great excitement.

The tragedy, while a shock to the friends of both men, was not altogether a surprise to them. They knew, and have known for several years, that against the architect Thaw had the most bitter feeling.

Oposonic Consumption Remedy.

A treatment for tuberculosis, based upon the known function of white blood corpuscles, namely, their power to assimilate and carry away disease bacilli, has been recently investigated with considerable success in a London hospital. It is found that if certain organisms, termed opsonins, are not present in sufficient strength, the white corpuscles are unable to do their duty, and the disease makes headway rapidly. If an examination of the patient shows a shortage of opsonins, a serum made of dead bacteria of the same variety as those causing the disease, is injected. The patient's own body then stimulates the production of the desired organisms. This condition may be preserved by daily tests until the disease is expelled. The most notable successes have been obtained in cases of lupus, the bacillus of which is identified with that of tuberculosis, only that the former attacks the skin.

Butter Storage Experiments.

Extensive experiments in the making and storing of butter made in the last eight months by the Agricultural Department reveal the fact that light salting, low temperature, full tubs or cans, to eliminate air, and cream received at the creamery in a perfectly sweet condition gave by far the best results for storage butter. Butter made from sour cream kept as well while in storage at low temperature, but rapidly deteriorated after being taken out, making it entirely unsatisfactory. Butter heavily salted did not keep as well as that with little salt.

PRESIDENT TO SEE CANAL.

Fall Trip to Panama Will Replace Proposed Western Tour.

Announcement of President Roosevelt's intention to visit the Isthmus of Panama next fall and personally investigate the work of construction on the great waterway came as a surprise from the White House, a Washington correspondent says. Incidentally it was also given out that Mr. Roosevelt would not make the proposed trip to San Francisco in the fall nor the tour of the Middle West which he had contemplated for next spring. In May, 1907, however, he will take a run into Michigan, stopping at Lansing for the agricultural college celebration.

It is expected the President will leave Washington for Panama the latter part of next October or in the early days of November. He will be absent about three weeks. The trip probably will be made on one of the big cruisers of the navy, but what vessel will carry the President and his party is yet not known.

None of the details of the trip has yet been worked out. Beyond the bare decision to make the trip the President has reached practically no conclusions. It is likely he will be accompanied on the journey by Secretary Taft and Chairman. Shonts of the Panama Canal Commission, but even this has not been determined definitely.

The President has long desired personally to inspect the route of the canal and to make himself personally familiar with the great undertaking of constructing the water way. The decision that he will visit the American zone on the Isthmus of Panama was not reached hastily, but has been under consideration for a considerable time. It is the expectation that the President will be able to spend at least a week on the canal zone and in that time he will familiarize himself with the situation by a study of it at close range. A personal visit to the canal zone will enable him to handle with an absolute knowledge of the situation the great problems which constantly will be arising in connection with the work of canal construction and administration.

EDITORIAL NOTES.

In Chicago they eat what can't and can't what they can't because nobody will take it any other way.

It seems that Secretary Shaw does not think that the cabinet gag rule holds outside of Washington.

Of course if there is anything that the President might have said about the Beef Trust and didn't, he is sorry for the omission.

The per capita circulation of the country is officially announced as \$32.45. And a lot of us are wondering what has become of the \$32.

Mr. Bryan's friends might suggest the advisability of his accumulating some new views on the currency question before he comes home.

If Secretary Hitchcock gets many more indictments for land frauds in Oregon, he will have to go into some other state to find men enough for the jury.

The corporations that were convicted of accepting rebates can use them to pay the finds. But it is pretty hard on the railroads who were convicted for giving them.

It ought to cheer Senator Allison a great deal in his sickness to know that Iowa has so many favorite sons who are "perfectly qualified for the vacancy if it should occur."

Col. Bryan says that this presidential boom was "so sudden." It is more than even chances that he will never have to make the same remark about an election.

Senator Teller warns the country not to try to dig the Panama canal from Washington. He evidently thinks that there has been enough mud slinging at Washington this winter already.

Judge Timlin of Wisconsin proposes to bar multi-millionaires from the U. S. Senate. The Judge evidently does not realize how much easier they make life for the poor man who has to live in Washington.

Without wishing to block the Immigration Bill, it might be a question whether it was not rather standing in our light to try to bar labor out of this just when we need it. Of course we do not want the anarchist nor the moral degenerate nor the habitual criminal. But after all there are stringent laws against these and against the loathsome diseased, the pauper and a good many other specifically named classes of undesirable. Yet there is an attempt being made to further put up the bars just when the farms of the west are crying for more labor, when the railroads of the country are trying to keep the laborers and prevent their drifting to the farms and also when the cotton fields of the south and the tobacco fields all over the country are bewailing a dearth of labor. The President, the Italian Ambassador, and numerous societies all over the country are working to a common end, to get the newly come immigrants to go into the country where their work is sorely needed and stop herding in the towns where it is not wanted. If this movement can be brought about, it looks as though we could stand a large tide of immigration for some time to come. It looks also as though this might be more Christian like way of handling the problem even the missionary problem than by barring the immigrant out altogether. The root of the whole agitation is in the labor unions who are afraid that if more laborers are imported they will be utilized in the big cities as strike breakers in crowding outmen who already belong to "drum." Now one does not want to be unkind, but it might be well to ask the question, how many of the men who are clamoring now for more stringent immigration laws would have to go back more than one generation to find their ancestry in Europe?

TO THE REPUBLICANS OF THE 8th SENATORIAL DISTRICT.

I hereby announce myself as a republican candidate for representative in the General Assembly, subject to the decision of the Republican Senatorial Convention in the 8th Senatorial District.

It was the purpose of the law makers in passing the last primary act that the voters should each have one vote for a candidate for representative, so that each county in a district, like ours, should have a representative in the General Assembly. Lake Co. has a senator.

I, therefore, solicit the votes of republicans in McHenry and Lake counties at the primary to be held August 4th next, for the office of representative and request that they mark a cross in the square opposite my name upon the official ballot. I am under great obligations to the republicans of this district for their support in the past and I shall try and merit their approval in the future.

Very respectfully,
Edward D. Shurtliff.
Marengo, Illinois.

J. L. SWAYER,
Republican Candidate For
COUNTY CLERK,
Subject to the action of the Primaries
to be held AUGUST 4, 1906.

GEORGE B. STEPHENS.

George Stephens, candidate for the republican nomination for treasurer, subject to the will of the coming republican primaries, which will be held later, is a native born Illinoisian. He was born at Homer, Will county, November 15, 1848, and since 1853 has always lived in Lake county.

Mr. Stephens served several terms as president of the Millburn Mutual Fire

Insurance Co., which was organized in 1855 and which is a strong local insurance concern.

He received his education in Lake county schools and since 1871 has been engaged in farming in Newport township. He has always been prominent in republican politics and served three terms on the board of supervisors, being elected chairman of that organization twice, serving as well as chairman of the Lake county board of review.

Your support will be appreciated at the primaries August 4.

ANNOUNCEMENT.

To the Republican Voters of Lake County.

After supporting and contributing to the success of the Republican party, for the past thirty years and never having held a County office, I feel I can consistently ask the Republican voters for their support of County Judge.

Fifteen years of active practice at the Lake county bar, leads me to believe that the duties of the office of County Judge

require the entire time of the Court; and if elected to that position, I will devote my whole time to the office and the best interests of the people of Lake county.

Your support will be most thankfully received at the primaries August 4.
EDWARD J. HEYDECKER.

Nature's Explanation.

Miss Rosenstein—He says his love for me is a burning passion, mother; but most lovers grow thin, vile he keeps growing fatter.

Her Mother—Well, perhaps he is expanding mit der heat!—Puck.

"None Is" or "None Are"?

All the friends of liberty of speech owe gratitude to Prof. Lounsbury of Yale for his defense in Harper's Magazine of the use of "none" as the subject of a plural verb. What idiot precisionist it was that started the movement to schoolmaster that use of "none" out of existence we do not know, but his effort has had a deplorable degree of success. An awful example ought to be made of some of the grammarians who try to make language conform to rules instead of making rules conform to language. It will take years to untwist the tongues of worthy people who have compelled themselves to say "none is" when their consensual impulse was to say "none are."—Harper's Weekly.

There is no need worrying along in discomfort because of a disordered digestion. Get a bottle of Kodol For Dyspepsia, and see what it will do for you. Kodol not only digests what you eat and gives that tired stomach a needed rest, but is a corrective of the greatest efficiency. Kodol relieves indigestion, dyspepsia, palpitation of the heart, flatulence and sour stomach. Kodol will make your stomach young and healthy again. You will worry just in the proportion that your stomach worries you. Worry means the loss of ability to do your best. Worry is to be avoided at all times. Kodol will take the worry out of our stomach. Sold by J. H. Swan.

Alpine Elevator.

Persons not hardy enough to ride the rigors of Alpine climbing are now enabled to mount to the summit of the Hammet-Schwend mountain, 3,600 feet above sea level, by the longest elevator in the world, an elevator 600 feet high. The elevator is located not far from Lucerne, where is a grotto in which the elevator shaft is hidden. It is operated by electricity. The cage is 12 feet square, and only seven passengers are carried each trip. The ascent is made in three minutes.

Was Wasling Away.

The following letter from Robert R. Watts of Salem, Mo., is instructive. "I have been troubled with Kidney disease for the last five years. I lost flesh and never felt well and doctored with leading physicians and tried all remedies suggested without relief. Finally I tried Foley's Kidney Cure and less than two bottles completely cured me and I am now sound and well." Sold by J. H. Swan.

Scattered Subjects.

The king of England has in Asia more than 300,000,000 subjects; in America, 7,500,000; in Africa, about 43,000,000; in Australasia, over 5,000,000, and in Europe, over 42,000,000. Classifying them broadly by religions, there are 208,000,000 Hindus, 94,000,000 Mohammedans, 58,000,000 Christians, 12,000,000 Buddhists and 23,000,000 of of various pagan or non-Christian religions.

The sincerest tribute that can be paid to superiority is imitation. The many imitations of DeWitt's Witch Hazel Salve that are now before the public prove it is the best. Ask for DeWitt's. Good for burns, scalds, chafed skin, eczema, tetter, cuts, bruises, boils and piles. Highly recommended and reliable. Sold by J. H. Swan.

"Cheesing" It.

Samuel Striet, who has been cheesing at this place for the past several years, reports the New Philadelphia (O.) Democrat, moved to near Walnut creek, where he will make cheese the coming summer. A man by the name of John Reeser will cheese at this place this summer. Everybody hated to see Mr. Striet leave because he was a good cheeser, and we all hope that the new cheeser will have the same success.

Thousand annually bear witness to the efficiency of Early Risers. These pleasant, reliable little pills have long borne a reputation second to none as a laxative and cathartic. They are as staple as bread in millions of homes. Pleasant but effective. Will promptly relieve constipation without griping. Sold by J. H. Swan.

Women Predominate.

There are 1,840,280 more men than women in the United States, and the same proportion prevails in almost every other country. The only exception is in Paraguay, where there are more than twice as many women than men. This is due to the fact that some years ago, in a political revolution and a war with Brazil and the Argentine Republic, the men were almost exterminated.

LOCAL HAPPENINGS.

ELGIN, ILL., June 25—Butter firm at 20c. Output of the week, 980,000.

Lee Burnett of Delavan, Wis., was visiting his parents over Sunday.

Born to Mr. and Mrs. Geo. Huber, on Monday, June 25, a baby boy.

Thomas Burnett has accepted a position in a barber shop in Burlington.

Mr. and Mrs. James Gullidge spent a few days last week in Waukegan.

Mr. and Mrs. Ward Little of Waukegan spent Friday with relatives at this place.

Mr. and Mrs. Geo. Cropper and family of Chicago spent the latter part of last week here.

W. R. Williams was transacting business in Chicago the fore part of this week.

Mr. and Mrs. H. Loomis of Chicago are visiting relatives and friends here this week.

The Cemetery Society will meet with Mrs. Will Williams, Thursday afternoon June 29.

Mr. and Mrs. Garret Ramaker of Waukegan spent the latter part of the week at this place.

Mrs. Schillke, Mrs. Geo. Kubaupt and Mrs. John Engman were Kenosha visitors one day last week.

Wayne Pullen left for Waukegan Monday to accept a position with D. T. Webb & Co., ice dealers.

Mrs. Chauncey Barber of Chetek, Wis., is visiting with relatives and friends at this place this week.

Arthur Dibble who is working in a barber shop at Delavan, Wis., was visiting his parents over Sunday.

Mrs. Frank Matthews of Burlington is spending this week with relatives and friends in this vicinity.

Misses Elvin and Bessie Gallidge visited their sister in Milwaukee, Wis., who accompanied them home over Sunday.

Mr. Merl Haynes, of Antioch, has been awarded the contract for the laying of 8,000 feet of cement sidewalks at Spring Grove.

A bus load of Odd Fellows from here went to Wilmot Saturday where they conferred degrees on a candidate and were highly entertained by the Wilmot lodge.

All traffic was delayed on this division of the Wisconsin Central rail road for some time Wednesday morning on account of a wreck of two freight cars, a little south of town.

Geo. Clark died at his cottage at Channel Lake Saturday evening. He was 76 years old and was a resident of Pleasant Prairie, at which place the funeral was held on Tuesday.

At the home of the bride's parents, Mr. and Mrs. Wm. Hancock, on Wednesday, June 20, occurred the marriage of their daughter Lillian to Mr. H. W. Spafford of Millburn. Rev. F. R. McNamara officiating.

The article on an improvement association in this week's issue of the News shows what others think of us for allowing our beautiful little village to become unsightly with weeds and rubbish, especially our main street. An association of this kind should be formed at once.

A great deal of dissatisfaction is expressed among the foreign people on account of the new law which is to go into effect about the first of October. The law is in regard to the issue of citizenship papers to foreigners, and it makes a large increase in the fee to be paid into the courts for these papers. In the past foreigners of the nation have been naturalized for the small fee of \$1, but after the new law goes into effect the cost of this service will be raised to \$7.

OBITUARY.

Raymond Olcott, youngest son of Oren Olcott, was born March 31st, 1902 and departed life June 15th 1902, after an illness of about two weeks.

Is that voice of music silent?
Have those charms forever fled—
And our much loved little Raymond
Numbered with the silent dead?

Yes! those sparkling eyes have faded,
And his form lies prostrate now;
Death has set his warning sign,
On his sweet and lovely brow.

He to weeping friends and kindred
Now has bid a fond adieu;
But, Oh, fond and loving father,
Deepest sorrow falls on you.

In thy memory, weeping father,
Treasured his last kiss will be—
And that last and faltering action,
Which expressed his love for thee.

Monna not that he early left you;
That his journey soon was o'er,
And the heart that beat so truly
Now is still to beat no more.

He has left a world of sorrow
For a land of heavenly rest,
Where no grief, pain or anguish
Ever can disturb his rest.

CARDS OF THANKS.

We wish to thank all who so kindly remembered our loved one through her long illness; and to all who so kindly ministered to us at the time of our bereavement.

Mrs. Phoebe Ames and family.

I desire to thank all who assisted in the illness and death of my loved one also those who sent flowers.

Oren Olcott.

Baby Clowns.
In the traveling circuses of France the babies of the company are put to work as clowns.

For Sale—A good farm in the Fox Lake region. Excellent location, price reasonable. For particulars address this office.

For sale—A second hand sail boat, one double sloop and one double work harness. Call on Fred Witt, on the old Smith farm at Sand Lake, or address, Lake Villa, Ill. 43w2

Buy your coal this month at the lowest price, on the basis of \$7.00 at the yard, or \$7.85 delivered to be settled for on or before 1906, as coal advances 10 cents per ton each month.

ANNOUNCEMENT.

We wish to inform the public that Prof. Stein and his orchestra will furnish music for our dance every Saturday night. The public are invited to attend. Love & De Sanctis.

Don't Delay.

If you have poor sight, inflammation and pain in the eyes, headache and nervousness, don't delay. Call on Miss Emmert, the well known optician, at the Lux hotel, Thursday, July 5.

It will cost you nothing to have your eyes examined and she will tell you whether or not glasses will remedy your trouble.

This optician has had twelve years experience in her profession and is equipped with the best of recommendations as to her fair business dealings, as well as to her ability to fit the eye properly.

Prices reasonable and no one urged to buy.

Deadly Serpent Bites.

are as common in India as are stomach and liver disorders with us. For the latter however there is a sure remedy: Electric Bitters; the great restorative medicine of which S. A. Brown, of Bennettville, S. C., says: "They restored my wife to perfect health, after years of suffering with dyspepsia and a chronically torpid liver." Electric Bitters cure chills and fever, malaria, biliousness, lame back, kidney troubles and bladder disorders. Sold on guarantee by J. H. Swan. Price 50c.

Death From Lockjaw.

never follows an injury dressed with Bucklen's Arnica Salve. Its antiseptic and healing properties prevent blood poisoning. Chas. Oswald, merchant, of Ronselaerville, N. Y., writes: "I cured Seth Burch, of this place, of the ugliest sore on his neck I ever saw." Cures Cuts, Wounds, Burns and sores 25c at J. H. Swan's.

Rhodesia Nugget.

A huge gold nugget, believed to be the largest yet found in Rhodesia, was lately taken to London. It weighs 21.62 ounces and measures about five and one-half inches in width. It was found about 15 miles southeast of Bulawayo, 62 feet below the surface. The nugget was two inches longer when found, but on taking it out of the ground a portion broke away.

"Sneezewood" Tree.

One of the natural curiosities of South Africa is the "sneezewood" tree, which is so called because one cannot cut it with a saw without sneezing, as the fine dust has exactly the effect of snuff. Even in planing the wood it will sometimes cause sneezing. No insect or worm will touch it; it is very bitter to the taste, and when placed in water it sinks.

My Hair Ran Away

Don't have a falling out with your hair. It might leave you! Then what? That would mean thin, scraggly, uneven, rough hair. Keep your hair at home! Fasten it tightly to your scalp! You can easily do it with Ayer's Hair Vigor. It is something more than a simple hair dressing. It is a hair medicine, a hair tonic, a hair food.

The best kind of a testimonial—
"Sold for over sixty years."

Following the Flag.

When our soldiers went to Cuba and the Philippines, health was the most important consideration. Willis T. Morgan, retired Commissary Sergeant U. S. A., of Rural Route 1, Concord, N. H., says: "I was two years in Cuba and two years in the Philippines, and being subject to colds, I took Dr. King's New Discovery for Consumption which kept me in perfect health. And now, in New Hampshire, we find it the best medicine in the world for coughs, colds, bronchial troubles and all lung diseases. Guaranteed at J. H. Swan. Price 50c and \$1.00. Trial bottle free.

Loss to Literature.

Lord Curzon, late viceroy of India, in a speech recently in London before the Society of Authors, said when appointed viceroy he was about to publish a book which he had written in India, but he had to cancel the arrangement, as Lord Salisbury had laid down the rule that it was supremely improper for a prospective viceroy to publish a book on the country he was about to govern.

Insurance Journals.

No business is so well supplied with trade journals as that of insurance—there being over 70 of these weeklies in the country, it is said. They depend largely on the advertising of the companies, and the withdrawal of much of the patronage of the three big life companies of New York as a result of the investigation is causing them some trouble.

Interesting to Asthma Sufferers.

Daniel Bante of Otterville, Iowa, writes: "I have had asthma for three or four years and have tried about all the cough and asthma cures in the market and have received treatment from physicians in New York and other cities, but got very little benefit until I tried Foley's Honey and Tar which gave me immediate relief and I have never been without it in my house. I sincerely recommend it to all." Sold by J. H. Swan

Sex in Population.

There are 1,861 cities in the United States with more than 2,500 inhabitants. Taking them all together there are 201,359 more women in them than men. This proportion has held good at every census except in 1890, when 1,400 cities of more than 2,500 inhabitants, taken together, showed 6,929 more men than women although there was an excess of 1,519,559 men in the entire country.

An Alarming Situation.

frequently results from neglect of clogged bowels and torpid liver, until constipation becomes chronic. This condition is unknown to those who use Dr. King's New Life Pills; the best and gentlest regulators of Stomach and Bowels. Guaranteed by J. H. Swan. Price 25c.

Deadly Climate.

Karachi, a port in northern India, has a most unpleasant climate. The parched desert country behind Karachi has a terrific heat. Jacobabad, 30 miles away, often records 125 degrees Fahrenheit. The one man train a day carries a coffin in the hot weather season "for the use of passengers." It need be, and in one year long ago 23 European engine drivers died while working their trains.

Converts in Sumatra.

rom Sumatra, the Rhenish missionary society reports a year of harvest such as it has never before seen. The number of pagans baptized during the year was 4,712, besides 136 Mohammedans. The total of Christians is now 61,764. In 307 schools 14,519 boys and girls are under instruction.

During the summer kidney irregularities are often caused by excessive drinking or being over heated. Attend to the kidneys at once by using Foley's Kidney Cure. Sold by J. H. Swan.

WILLIAMS BROTHERS

ANTIOCH DEPARTMENT STORE

Everything Ready For Spring.

Come this week and see the new Spring Dress Goods just opened.
Come this week and see the new Spring Silks.
Come this week and see the Butterick and Designer Spring Styles and Patterns.

Your Attention is called to a very attractive line of

LAWNS, DIMITIES, MOHAIRS, CASHMERES, BRILLIANTINES, FANCY PRINTS, GINGHAMS, PERCALES, LACES, EMBROIDERY, WIDE EMBROIDERY FOR CORSET COVERS.

NEW LINE OF CORSETS, MUSLIN AND RIBBED UNDERWEAR.

Lace Curtains and Draperies.

Ready made Sheets and Pillow Slips.

For spring sale D. M. Ferry & Co's. Garden Seeds in bulk or package.

Lees' Poultry Goods, fill the basket and make healthy chicks.
Blatchford's Stock Food and Calf Meal makes slick stock.

These goods are proving satisfactory and meeting with a constantly increasing demand.

GENT'S FURNISHINGS.
We offer a large line of well selected, up-to-date goods, embracing

Ties, Collars, Gloves, Underwear, Hosiery, Hats and Caps.

SELZ SHOES AND RUBBERS.
Selz Shoes and Rubbers always give satisfaction in fit, wear and style. We are still selling Shoes and Rubbers at the old prices, though manufacturers have all advanced their prices.

GROCERIES.

Did you find our 25c Coffee to equal any you ever had at 30c?
Did you try 1 3-pound can of Corn at 10c? You can buy a case of 24 cans for \$2.00.
Did you know that we will save you 40c on an investment of \$2.00, that is 20 per cent?
Did you try 1 can of Early June Peas at 10c? You can buy a case of 24 cans for \$2.30.
Did you know you cannot do better than buy now all you want this summer?
Did you know that if you buy the Monarch Canned Vegetables, Fruits, Preserves and Fish you are sure of buying the best at about the same prices as regular standard goods?
Did you try the Monarch Salad Oil, Pure Olive Oil, Chile Sauce and Catsup?
Did you try a big bottle Pickles, Sweet Mixed, Sweet Gherkins, Sour Gherkins and Chow Chow at 15c?
Did you try our unequalled Fancy Full Cream Cheese?
Did you buy 6 cuts of Keystone Plug Tobacco for 25c?
Did you buy 1,500 Matches for 10c, or 6,000 Matches for 35c?
Did you know that these are only a FEW of the MANY BARGAINS you can find at this store?

HARDWARE.

We are agents for American Field Fencing, have a large stock, prices are now low. Also Field Fencing for poultry. Regular Poultry Netting 1 to 6 feet high. Agents for the National Wire Co's Woven Wire Cloth. Now is the time to get ready for Screen Doors, Window Screens, etc.

Diamond brand Farm Field and Garden Tools. Paints, Oils, Brushes, Glass, Calcimine, Varnishes, etc.

YOUR CLOTHES-PREPARATION DURING THE EARLY DAYS OF FALL

Many Splendid Styles.

Scores of Beautiful Patterns from which to select.

The Double-Breasted

Styles are Highly Popular

Single-Breasted Sacks

as They are Now Made.

EARLY PURCHASE of Fall Apparel is advisable for two principal reasons:— One gets the choicest selections among the more exclusive fabrics, and in fact the great values, where the feature of exclusiveness is appreciated. Again, severe weather is apt to find us unprepared when such purchases are delayed until Jack Frost drives us to protect ourselves.

The noticeable feature of the new Sack Suit is its length; and all men welcome so common-sense a style heartily. It is proper to have either side or center vents in the coat, although we favor the latter. It is quite as proper to have none at all.

Between the double-breasted and single-breasted styles every man must choose for himself. For correctness there is no choice. It is a good idea to change from one to the other. We can help you choose the style best suited to you, if desired. We have them all, in a practically endless variety of patterns.

\$10 TO \$15 I have Just Received 75 Suits for Men in the Latest Styles. Call and see them. **\$10 TO \$15**

ADVERTISE IN THE NEWS

One Man's Evil

By EFFIE ROWLAND

CHAPTER XII.—(Continued.)

"That woman will give us trouble," he said to himself; and then the next instant he laughed recklessly. "But why should I be afraid of a woman? Bah! I am losing my nerve. This day's work is shaking me."

The road lay to the north of London, and when at last Stanton stopped the driver, the cab had pulled up in front of a shabby looking little house that stood in a garden and had a somewhat desolate air.

It was some time before there came an answer to his summons; then a brisk step sounded, and the door was opened and a small, squat woman's figure disclosed to view.

"Lawks, Master George!" she said, "fancy your coming like this! You didn't ought to have come to the back door. I'm sorry I kept you waiting, sir; I was busy putting the room to rights."

Stanton passed in through the narrow entrance, and followed the woman to the front part of the house.

"How is he, Sarah?" he asked.

"Just the same, sir; no better, no worse. He lies there, poor dear; so patient-like, and his eyes are so bright. It's strange to have to think there's no sight in them. Will you come and see him, sir? But stay; shan't I get you a cup of tea first?"

"I want nothing," Stanton answered. "I have come here, Sarah, because I want you to take a journey for me. I have to send some important papers to the north of England to-night, and the only person I can trust to do this is yourself. You need not be alarmed, however; I shall remain with my brother. If necessary, I will have in a trained nurse."

Tears gathered in Sarah's eyes. She was a plain little creature; but the look that was written on her homely features in this moment gave her almost a touch of beauty.

"Oh! don't take me away from Master Walter, sir!" she pleaded. "You don't know what it means to me. Do you suppose any other woman in the world will do more for him than I have done?"

Stanton laid his hand on the woman's shoulder. He was nervous and irritable beyond description; but he had to curb himself; he had to play his part, and there was so little time in which to play it.

"Dear old friend," he said, almost affectionately, "don't make yourself so unhappy. You will be back here in another twenty-four hours."

An hour later George Stanton had gripped Sarah's hand in farewell and had seen her sturdy figure walk swiftly down the garden to the road outside.

She carried, poor soul, safely hidden in the bosom of her dress, a small, square packet which she was to convey to Mill Cross Court.

Stanton had given her a note to the butler. In this he briefly said that the bearer was carrying some papers that were to be deposited in Sir Gerald's study, placed on his writing table, and given to him immediately he arrived.

Stanton prepared to return to Gerald's chambers. Before he went he stood in his brother's room and looked at the poor, helpless figure that lay there.

Sarah had left everything that her boy would need—he wanted so little. If she could only have imagined that the minute her back was turned Master George would leave that poor, helpless creature unattended and unwatched, how quickly would Sarah have flown back again, and refused the duty he had imposed upon her!

It was close on seven when Stanton stood once again in Gerald Tenby's chambers.

"Everything is prepared," he said. "Now, Tenby, you have got to have your wits about you to-night. One false step, my friend, will land us beyond all hope."

CHAPTER XIII.

Lord Marchmont arrived punctually at four o'clock. He was received by his brother and by his daughter. Lady Betty was still out driving.

"My wife will be here directly," Mr. Marchmont said, as he greeted his brother; but Lord Marchmont evidently was not in the least eager to see Lady Betty.

"I have come to talk with you on a little business, Edward," he said, and Antonia felt that she was dismissed.

There had never been any great sympathy between the brothers; yet Edward Marchmont was always ready to respond to any call his brother made upon him.

"You want me to do something for you, Pierce?" he asked, as they found themselves alone.

"Yes. I want to ask your opinion. You know this Gerald Tenby, who has inherited Mill Cross Court?"

This was the last question he had expected to hear. He answered with some difficulty.

"Sir Gerald is an acquaintance of mine, not a friend."

"This is the position, Edward: The other day I received a letter from Gerald Tenby, asking my permission to approach Antonia with a view to marriage."

Edward Marchmont looked at his brother sharply.

"You approve of this, Pierce?" he asked.

"I have not set aside Gerald Tenby's proposal," said Lord Marchmont, "because, although I should never consider him my daughter's equal in any sense, in another his present position gives him a certain right to approach her. I cannot, of course, forget that he is the son of Hubert Tenby—whom I have no hesitation in classing as one of the most unmitigated scoundrels I was ever my lot to meet—and had this inheritance not passed to Gerald Tenby as it has done, I should not for an instant have given heed to such a suggested alliance. But as things are, I do not see that I have a right to object to this man as a husband for Antonia unless it is proved to me that he is not worthy of her."

"My dear Pierce, I am sorry I cannot be of any definite use to you. At the same time, I must tell you that this young man is regarded most favorably by everybody in society; a brilliant future was predicted for him when he was only his uncle's heir. I understand that he is exceedingly clever, and I should say that with such wealth as he now commands a brilliant future must inevitably be his. You will, however, approach Antonia yourself before he does?"

"Antonia will obey me," Lord Marchmont said, loftily. "If I give her my wish she should marry this man she will marry him."

At that very moment there came a tap at the door, and Antonia herself appeared. The girl was looking very pale; her eyes had a strained expression.

She carried a little note in her hand. It was evident, from the nervous way in which her fingers closed around the envelope, that this note had contained bad news.

"You want me, Antonia, my dear?" Edward Marchmont asked, hurriedly.

She had gone to her uncle, forgetting for the moment that her father was there, and the sight of him checked her eagerness to open her heart to her uncle.

"I hardly know how to begin," Antonia said, with a catch in her voice. "I hardly know what brought me to you, Uncle Edward, except that I feel I must have some sympathy."

Lord Marchmont looked at his daughter very coldly.

"Explain yourself, Antonia," he said. "You are speaking very strangely."

The girl turned to her uncle. It chilled her suddenly to realize that what she had to say would find but little tender treatment from her father.

"Last night," she said, "I was absent, Uncle Edward, for dinner. I fear you must have thought this very strange; but I explained all to Lady Betty when I came home. I met with an accident as I was driving back from Lady Charlotte Singleton's. You see, I cannot move this arm very easily. That was not what kept me so late, however; it was a strange and wonderful thing, uncle. You have heard me say that I believed that Hubert Tenby was not dead?"

Both the men who listened started, and Lord Marchmont's brows contracted sharply.

"Well, dear," Antonia went on, her voice gaining a little confidence, "last night my faith was proved to be true, for I met Hubert unexpectedly. He had come back to see his father, to claim his father's forgiveness, to prove his innocence. We talked for a long time. I had to tell him that his father was dead. It was a dreadful moment, yet when he would have faltered, and have gone back to his obscurity, I told him, 'Antonia went on, very quickly, 'that for the love he bore his dear father he must remain to claim his title and his proper place; but even while I did this, I felt instinctively that I was urging him to face a terrible future, and Uncle Edward, I was right. Oh! I was right. There was a break in his voice. 'I don't know what it was I feared, but I did fear for him. Something has told me all along that if Hubert came back there would be great difficulties to overcome; that the enemy or enemies that sent him to his ruin would never let him work unmolested.'"

"I can scarcely believe my ears," said Lord Marchmont, in a cold, hard tone. "Are you telling us the truth, Antonia? Are you speaking of facts? Is it possible that my daughter can have so far forgotten what was due to herself as to pass hours speaking with a man who is nothing more or less than a felon and an outcast? Is it possible that you, my child, are daring to link yourself even in sympathy, with one so degraded as Hubert Tenby has been proved to be?"

"And is it possible," she said, in a low, clear voice, "that you, my father, should be so miserably prejudiced and unjust as to condemn a man without knowing the truth, as to turn your back upon one whom you have known from childhood, and deny him those rights open to every man?"

"Silence! How dare you speak like this to me? I did, indeed, do a wrong thing when I let you come to this house. You shall not remain here an hour longer than is necessary. Get your things put together, and be ready for me when I return. I am horrified beyond measure that my daughter should have acted and spoken as you have done."

He walked to the door, despite the protests his brother made. He took no notice of Edward Marchmont's words; passed out, and left the house instantly. Antonia smiled in a wan fashion.

"Let him go, Uncle Edward," she said. "Though he is called my father, you see for yourself what the bond is between us. Let him go, and give me your attention instead. Oh, Uncle Edward! I am very unhappy. An hour ago I thought life most beautiful; and now—now I hardly know what to think, what to fear most."

Edward Marchmont took her two trembling hands and drew her into his arms.

"Speak out, Antonia," he said, gently. "Let me help you if I can."

And she told in broken words all her story, till she came to the moment when this letter she held in her hand had been sent round from the hotel where Hubert was staying. It was from Ben Coop. Only a few words, yet they seemed weighted with a presentiment of evil.

"My dear child," said Edward Marchmont kindly, "I think both you and this good fellow are making a great mistake. What if Hubert has not returned from his visit to the lawyers? It is now early afternoon; he may have had to wait, or he may have been detained by a thousand and one things. There is really nothing to alarm yourself in this absence of Hubert."

"I feel," said Antonia, "I know Ben is right. Something has happened. I feel that Hubert is lost to me just as I have found him."

found him," and she shivered as she spoke. It was as if some chilly hand had touched her, bringing her a message of woe.

CHAPTER XIV.

Antonia never forgot the tenderness that was shown to her by her uncle in this hour. The sympathy between them deepened, and became a bond that nothing but death would touch; in fact, Edward Marchmont was more than moved by the girl's story.

It was true he had known nothing of Hubert in the past, and was unable to form a personal judgment of the young man, but he had by this time realized that Antonia's nature and character were by no means ordinary, and he could not fail but be struck by the girl's enthusiasm and faith; yet he sighed a little, for he saw that the future would be set with difficulties. Indeed, when Antonia firmly announced her decision of refusing to obey her father's will, Edward Marchmont felt that it was his duty to argue with her on this point.

"I am sorry," Antonia said, quietly, "but it is quite impossible for me to allow my father to control me in this. Uncle Edward, I could not go to Egremont just now. Perhaps if this news had not come, if poor Ben had not let me see that he feared something, I might have gone for a time. You speak of a separation," the girl added, sadly, a moment later, "but do you honestly think, Uncle Edward, that my father and I have ever been united? What could have brought him to London in this way I cannot understand; but he takes a terrible interest in me, and, as a matter of fact, it is not of me that he thinks at all—it is always of himself. But I shall not stay here, dear," Antonia added, quickly; "that would only make complications between you and him. I have decided on my plans. I shall ask Lady Charlotte Singleton to let me stay with her for a time. I will write also to my father, and remain here till his answer comes. He has told you what hotel he is staying at, I suppose?"

Edward Marchmont nodded his head. He gave her the address. Antonia was still waiting for her father's reply when Lady Betty returned to the house.

The girl avoided seeing her. She had told her uncle she would remain in her room for an hour or two. It was not long before Lady Charlotte sent an answer to her letter. A cab brought it, a few pencilled words full of delight, bidding the girl welcome whenever she chose to come. This the first step was made easy; but Antonia's heart was full of foreboding as she sat waiting for her father's last word.

"I came finally in the form of her own letter torn in two. It was natural that for one moment Antonia Marchmont should feel a pang. Though there had never been any love between herself and her father, yet they had been together all her life, in one sense, and though he had never done anything to win her affection, she could not utterly forget that he was her father."

Lady Betty heard of Lord Marchmont's arrival and departure with a shrug of her shoulders.

"Where is your master?" she inquired, in her curtest way, and when she was told that Mr. Marchmont was in his study she went there, determined to be disagreeable.

"I am here, as you desired," she said, coldly. "I have sacrificed my afternoon at your decree, and I find that your brother has not even the courtesy to wait for my return. I have not been informed to what we owed the unusual honor of a visit from Lord Marchmont."

"Pierce came to see me to ask my opinion as to the merits of a man who has proposed for the hand of Antonia in marriage. Pierce understood that this man was a constant visitor at my house, and argued naturally from that that I should be able to assure him that this man was fitted to be the husband of such a girl as Antonia."

Lady Betty's heart was beating at fever heat.

"How ridiculous you are, Edward!" she said. "You will persist in putting Antonia on a pedestal, as if there were no other girl in the world as good as she! I hope you assured Lord Marchmont that this man, whose name you have not given me, was indeed worthy of your much-lauded Antonia?"

"I told my brother that, although Gerald Tenby was a constant visitor here, I was not—"

He got no further than this. Lady Betty had broken in on his speech. (To be continued.)

Utilized Dog for a Feast.

Among the employees of the registry division of the city postoffice is a man who has traveled extensively in regions more or less remote and unfrequented by the average globe trotter, says the Washington Star. In his numerous journeys he has collected a large fund of information concerning customs and characteristics of native races and tribes in various parts of the earth, and strange things that have happened to him and the startling sights he has seen are occasionally narrated to groups of his associates in the office.

One of his latest yarns was told, he said, with a view to showing the remarkable faculty of the Sumoans for utilizing everything put in their reach.

"Our party," said the story teller, "went out one day for a hunt some distance from the sea coast. We had such poor luck in starting game that one of our number, seeing nothing else to shoot at, killed a yellow dog which we happened to run across in our ramble. The party proceeded some distance further and returned by the same route in perhaps half an hour. When we neared the spot where the unfortunate dog had been slain we were startled to see a crowd of native Indians in festivity. We watched the merry-makers for some time, and finally discovered that they were cooking the carcass of the dog preparatory to enjoying a feast. Meanwhile, having stretched the skin of the canine into a kind of a drum, they were beating it and having a dance."

When two old friends meet, after a long absence, they eye each other very much as two strange dogs do: Each one is seeing if the other has held his own.

SOME LOCAL RESULTS OF CELEBRATING THE FOURTH.

THE STAR-SPANGLED BANNER.

O say, can you see, by the dawn's early light,
What so proudly we hail'd at the twilight's gleaming—
Whose broad stripes and bright stars, through the clouds of the night,
At the ramparts we watch'd were so gallantly streaming!

And the rocket's red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there;
O say, does that star-spangled banner yet wave
O'er the land of the free, and the home of the brave?

On that shore dimly seen through the mists of the deep,
Where the foe's haughty host in dread silence reposes,
What that silence breaks, o'er the towers that keep
As it stately blows, now conveys, now discloses?

Now it catches the gleam of the morning's first beam,
In full glory reflected now shines on the sea,
And the star-spangled banner in triumph doth wave
O'er the land of the free, and the home of the brave.

And where is that band who so vauntingly claim'd
That the havoc of war and the battle's confusion
A home and a country should leave us no more?
Their blood has wash'd out their foul footsteps' pollution!

No refuge could save the hireling and slave
From the terror of flight, or the gloom of the grave;
And the star-spangled banner in triumph doth wave
O'er the land of the free, and the home of the brave.

O! thus be it ever, when freemen shall stand
Between their loved homes and the war's desolation!
Blest with vict'ry and peace, may the heav'n rescued land
Praise the power that hath made and preserved us a nation.

Then conquer we must, when our cause it is just,
And this be our motto—"In God is our trust."
And the star-spangled banner in triumph shall wave
O'er the land of the free, and the home of the brave.

—Francis Scott Key.

Willie Perkins was 8 years old and Nero was only 4, but when Nero walked on all fours he was nearly as tall as Willie, and when he lifted his great shaggy dogship upon his hind legs he could lay his forepaws on somebody's shoulders, and that somebody was Willie's father.

Mr. Perkins called Willie and Nero "the chums," and it was indeed seldom that the two were apart, except at school times and meal times, and when the sandman had paid Willie a visit; even at those times they were not far apart.

When Willie went to school Nero trotted along by his side, and, like the good fellow that he was, when they came to the door and Willie said, "Now, old boy, you wait for me right here in the yard and be sure not to frighten any of the children as they come in. Tell me good-by now and be a good fellow," Nero would wag his tail very hard, lick the hand that had been patting his head so lovingly all the time Willie was talking to him, and then lie down and watch his master disappear through the great door of the school house.

By and by Nero would get tired of lying still and would go for a walk around the building. The sky fellow! He well knew that the janitor's wife would have a little heap of bones hidden out in one corner of the yard for him, and when he saw her he would look up to see her watching him from the basement door. Then again that great tail would wag as if he said, "Thank you so much for those nice, meaty bones." When winter came there was a large box that the janitor's wife and Willie taught him

to go into when he was cold and wanted to lie down, and so his school days were not at all dreary ones.

But the happiest time for "the chums" was when Willie put his books away for the long summer vacation and he and Nero had the whole day together. Even when Willie had cut the kindling it was Nero who carried it to the house in a basket held tightly by his strong teeth, while Willie carried a bucketful of coal.

By and by Willie began to tell Nero of a great day that was coming, when all the boys would have firecrackers and Roman candles and torpedoes, and there would be flags flying and bands playing and everybody would have a good time.

Nero always listened to every word that his little master said, and now and then when Willie would give his head an extra hard pat by way of emphasis Nero would bark and set his tail going harder than ever. That tail always wagged when Nero was pleased. Sometimes Willie's mother would allow the dog to come into the sitting room, but one day the tail knocked a handsome vase off of the table and broke it, and after that Nero had to lie down very quietly if he got into the house.

Two days before the Fourth Willie bought his fireworks; there were five packages of firecrackers and five of torpedoes, four rockets, four Roman candles, two wheels and a long piece of punk. Nero went with Willie to the store to buy them, but he had to wait outside while Willie went in, and so as soon as they reached home Willie opened the package

and showed Nero everything it contained. "Now, we'll fire off a few crackers," said Willie to Nero, "but we'll have to save the most of them (all the Fourth, because us boys are going to have our crackers an' torpedoes together. Won't we have a fine time, marching to the commons, with our drums beating and some blowing and daze dying! But there's one trouble about you, Nero, an' that is, you can't march with us, because the boys decided that nobody can march without they have one of our flags, an' there's just ten flags an' ten boys. I'm to give out the flags an' if there was any boy that was sick you could have his place, if you could only wave a flag."

Nero dropped his head and looked very sad. Willie thought it was because Nero was so badly disappointed, but perhaps it was because the faithful fellow saw that his friend was troubled. As they sat there, Nero looking so sad and Willie with his elbows resting on his knees and his chin buried in his hands, they heard some one whistle and, looking up, saw Tom Evans coming toward them.

"Heard the news?" Tom asked.

"No. What is it?" answered Willie, forgetting for a moment his trouble over Nero.

"Ed Bishop's going with his folks to the city for the Fourth, an' so you'll have to find some one else to take his place in our procession."

Willie gave Nero a quick look. "Oh, I wish you had hands!"

"Who'll you get?" asked Tim, after waiting a moment for Willie to speak.

"Dunno yet; I'll have to think about it first. See here, I've got lots of things twice as much as we have to have."

"I should say you have! You're lucky. All the other boys say they had a hard time to get what they had to. How'd you manage it?"

"I earned the money, getting coal and kindling," Willie explained.

"Well, you ought to have the right to give out the flags. We'll all meet here at 10 sharp, and Tom's answered on."

When he was gone, Willie began to talk to Nero again.

"Now, there it is. I have firecrackers an' torpedoes enough for you an' me too, an' you helped me earn 'em, carrying kindling, didn't you? Oh, why haven't you some hands to carry a flag with?"

Willie was excited now, and up jumped Nero, waving his tail as hard as he could. Willie looked at him for a minute and then turned a double somersault, and came up shouting, "Hurrah! hurrah! You shall march with us. I know I can do it!"

Willie was excited now, and up jumped Nero, waving his tail as hard as he could. Willie looked at him for a minute and then turned a double somersault, and came up shouting, "Hurrah! hurrah! You shall march with us. I know I can do it!"

Willie was excited now, and up jumped Nero, waving his tail as hard as he could. Willie looked at him for a minute and then turned a double somersault, and came up shouting, "Hurrah! hurrah! You shall march with us. I know I can do it!"

Willie was excited now, and up jumped Nero, waving his tail as hard as he could. Willie looked at him for a minute and then turned a double somersault, and came up shouting, "Hurrah! hurrah! You shall march with us. I know I can do it!"

Willie was excited now, and up jumped Nero, waving his tail as hard as he could. Willie looked at him for a minute and then turned a double somersault, and came up shouting, "Hurrah! hurrah! You shall march with us. I know I can do it!"

"Heard the news?" Tom asked.

"No. What is it?" answered Willie, forgetting for a moment his trouble over Nero.

"Ed Bishop's going with his folks to the city for the Fourth, an' so you'll have to find some one else to take his place in our procession."

Willie gave Nero a quick look. "Oh, I wish you had hands!"

"Who'll you get?" asked Tim, after waiting a moment for Willie to speak.

"Dunno yet; I'll have to think about it first. See here, I've got lots of things twice as much as we have to have."

"I should say you have! You're lucky. All the other boys say they had a hard time to get what they had to. How'd you manage it?"

"I earned the money, getting coal and kindling," Willie explained.

"Well, you ought to have the right to give out the flags. We'll all meet here at 10 sharp, and Tom's answered on."

When he was gone, Willie began to talk to Nero again.

"Now, there it is. I have firecrackers an' torpedoes enough for you an' me too, an' you helped me earn 'em, carrying kindling, didn't you? Oh, why haven't you some hands to carry a flag with?"

Willie was excited now, and up jumped Nero, waving his tail as hard as he could. Willie looked at him for a minute and then turned a double somersault, and came up shouting, "Hurrah! hurrah! You shall march with us. I know I can do it!"

Mrs. Geo. Edwards of Chicago is spending a few weeks with relatives in and about Russell.

Miss Josie Browe has returned to her home in Minneapolis after spending a two weeks visit with relatives about this place.

Thought She Was a Lady. The restaurant waiter did not mean to be rude. The mistake was purely a social error.

"What will you have next, lady?" he asked, with the courtesy that becomes a waiter.

"Don't address me as lady" retorted the diner, with some show of irritation.

"Excuse me, ma'am," replied the waiter, "but all of us is liable to make mistakes."

DO YOU GET UP WITH A LAME BACK?

Kidney Trouble Makes You Miserable.

Almost everybody who reads the newspapers is sure to know of the wonderful cures made by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy. It is the great medical triumph of the nineteenth century; discovered after years of scientific research by Dr. Kilmer, the eminent kidney and bladder specialist, and is wonderfully successful in promptly curing lame back, kidney, bladder, uric acid, troubles and Bright's Disease, which is the worst form of kidney trouble.

Dr. Kilmer's Swamp-Root is not recommended for everything but if you have kidney, liver or bladder trouble it will be found just the remedy you need. It has been tested in so many ways, in hospital work, in private practice, among the helpless too poor to purchase relief and has proved so successful in every case that a special arrangement has been made by which all readers of this paper who have not already tried it, may have a sample bottle sent free by mail, also a book telling more about Swamp-Root and how to find out if you have kidney or bladder trouble. When writing mention reading this generous offer in this paper and send your address to Dr. Kilmer & Co., Binghamton, N. Y. The regular fifty cent and one dollar bottles are sold by all good druggists. Don't make any mistake, but remember the name, Swamp-Root. Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

Hump Back

SCOTT'S EMULSION won't make a hump back straight, neither will it make a short leg long, but it feeds soft bone and heals diseased bone and is among the few genuine means of recovery in rickets and bone consumption.

Send for free sample. SCOTT & BOWNE, Chemists, 409-415 Pearl Street, New York.

Uncle Sam's Birthday.

The people of Rosecrans and vicinity will celebrate our National birthday, July 4th, in a most unique and interesting way in Ames' grove at Rosecrans.

It promises to be a decidedly old fashioned picnic. Special plans are being made for the entertainment of ladies and children.

Beginning at eleven o'clock with music, recitations, etc., by local talent, the program will be completed with an oration by John Pope, of Waukegan.

Immediately following the program dinner will be served by the ladies. Chicken pie, roast ham, pies, cakes, pickles and goodies galore, such as the farmer wives of Rosecrans know how to concoct.

At 2:30 p. m. a baseball game will begin. For those who do not enjoy a ball game there will be races, games, music, swings, freckle races, etc. Ice cream and temperance drinks and fruit may be obtained on the grounds.

The proceeds from this picnic is to be used for the Rosecrans church.

You cannot induce a lower animal to eat heartily when not feeling well. A sick dog starves himself and gets well. The stomach, once overworked, must have rest the same as your feet or eyes. You don't have to starve to rest your stomach. Kodol For Dyspepsia takes up the work for your stomach, digests what you eat and gives it a rest. Put it back in condition again. You can't feel good with a disordered stomach. Try Kodol. Sold by J. H. Swan.

Russian Conscripts. Every year about 280,000 conscripts are added to the Russian army. In times of peace it numbers 1,000,000 men, and is the largest standing army in existence.

Warning. If you have kidney or bladder trouble and do not use Foley's Kidney Cure, you will only have yourself to blame for the results, as it positively cures all forms of kidney and bladder diseases. Sold by J. H. Swan.

Question. A Nebraska man advertises for a wife who can take a joke, but can he prove that he can make one?—Boston Herald.

The sworn statement of the manufacturer protects you from opiates in Kennedy's Laxative Honey and Tar—the cough syrup that drives the cold out of your system. Sold by J. H. Swan.

NOTE OF INTEREST. The fund to perpetuate Dr. Barnardo's noble work for English waifs has reached \$200,000, which it is hoped to increase by \$1,000,000 more.

Ten Years in Bed.

R. A. Gray, J. P., Oakville, Ind., writes: "For ten years I was confined to my bed with disease of my kidneys. It was so severe that I could not move part of the time. I consulted the very best medical skill available, but could get no relief until Foley's Kidney Cure was recommended to me. It has been a Godsend to me." Sold by J. H. Swan.

Cleveland Climbs. San Francisco was one of the two cities which were passed by Cleveland in the decade from 1890 to 1900. Cincinnati was the other.

Chronic bronchial troubles and summer coughs can be quickly relieved and cured by Foley's Honey and Tar. Sold by J. H. Swan.

Hungry Bunch. The new British parliament drinks half as much wine as its predecessors, but eats twice as much, and the kitchen committee is losing money on its restaurant.

Constipation makes the cold drag along. Get it out of you. Take Kennedy's Laxative Honey and Tar cough syrup. Contains no opiates. Sold by J. H. Swan.

Norway Industry. There are four calcium carbide factories in Norway. Their export in 1904 was 5,258 tons, valued at about \$265,000. In 1905 the export reached nearly 9,000 tons.

No good health unless the kidneys are sound. Foley's Kidney Cure will make the kidneys right. Sold by J. H. Swan.

"King's Weather." The recent visit of King Edward to France has given the King another English phrase, which they have added to "high life," "sportsman," "flashable" and the rest. They now call fine weather "king's weather."

On the first indication of kidney trouble, stop it by taking Foley's Kidney Cure. Sold by J. H. Swan.

Sour Stomach

No appetite, loss of strength, nervousness, headache, constipation, and breath, general debility, sour rising, and catarrh of the stomach are all due to indigestion. Kodol cures indigestion. This new discovery represents the natural juices of digestion as they exist in a healthy stomach, combined with the greatest known tonic and reconstructive properties. Kodol Dyspepsia Cure does not only cure indigestion and dyspepsia, but this famous remedy cures all stomach troubles by cleansing, purifying, sweetening and strengthening the mucous membranes lining the stomach.

Mr. S. S. Ball, of Ravenswood, W. Va., says: "I was troubled with sour stomach for twenty years. Kodol cured me, and we are now using it in milk for baby."

Kodol Digests What You Eat. Bottles only \$1.00 Size holding 2 1/2 times the trial size, which sells for 50 cents. Prepared by E. O. DAWITT & CO., CHICAGO. J. H. SWAN, ANTIOCH.
